The United States and Biological Warfare Stephen Endicott, Edward Hagerman, 1998-11-22 The United States and Biological Warfare is a major contribution to our understanding of the past involvement by the US and Japanese governments with BW with important crucial implications for the future Pieces of this story including the Korean War allegations have been told before but never so authoritatively and with such a convincing foundation in historical research This is a brave and significant scholarly contribution on a matter of great importance to the future of humanity Richard Falk Albert G Milbank Professor of International Law and Practice Princeton University The United States and Biological Warfare argues persuasively that the United States experimented with and deployed biological weapons during the Korean War Endicott and Hagerman explore the political and moral dimensions of this issue asking what restraints were applied or forgotten in those years of ideological and political passion and military crisis For the first time there is hard evidence that the United States lied both to Congress and the American public in saying that the American biological warfare program was purely defensive and for retaliation only The truth is that a large and sophisticated biological weapons system was developed as an offensive weapon of opportunity in the post World War II years From newly declassified American Canadian and British documents and with the cooperation of the Chinese Central Archives in giving the authors the first access by foreigners to relevant classified

documents Endicott and Hagerman have been able to tell the previously hidden story of the extension of the limits of modern war to include the use of medical science the most morally laden of sciences with respect to the sanctity of human life They show how the germ warfare program developed collaboratively by Great Britain Canada and the United States during the Second World War together with information gathered from the Japanese at the end of World War II about their biological warfare technology was incorporated into an ongoing development program in the United States Startling evidence from both Chinese and American sources is presented to make the case An important book for anyone interested in the history and morality of modern warfare

Toxic Exposures Susan L. Smith, 2017-01-17 Mustard gas is typically associated with the horrors of World War I battlefields and trenches where chemical weapons were responsible for tens of thousands of deaths Few realize however that mustard gas had a resurgence during the Second World War when its uses and effects were widespread and insidious Toxic Exposures tells the shocking story of how the United States and its allies intentionally subjected thousands of their own servicemen to poison gas as part of their preparation for chemical warfare In addition it reveals the racialized dimension of these mustard gas experiments as scientists tested whether the effects of toxic exposure might vary between Asian Hispanic black and white Americans Drawing from once classified American and Canadian government records military reports scientists papers and veterans testimony historian Susan L Smith explores not only the human cost of this research but also the environmental degradation caused by ocean dumping of unwanted mustard gas As she assesses the poisonous legacy of these chemical warfare experiments Smith also considers their surprising impact on the origins of chemotherapy as cancer treatment and the development of veterans rights movements Toxic Exposures thus traces the scars left when the interests of national security and scientific curiosity battled with medical ethics and human rights

Harm's Way Anthony W. Rasporich, Maxwell Foran, 2004 The stories told in this collection though tragic for many illustrate the steadfast determination and courage of people in the face of misfortune and extreme distress From the lesser known weed outbreaks and tornadoes to the world wide influenza outbreak in 1918 that devastated many Calgary families these stories focus on the human side of these disasters It may be a heroic individual or the collective response of a community but what is truly remarkable in these stories is the human response to the world being turned upside down by famine and disease by flood fire or rock slide by wind and cold by dynamite or gas explosions or even by the seemingly mundane threat of weeds upon crops It is the resolution to continue to fight and the persistence of the human spirit and its adaptability to challenges that is the true story of a century of development in western Canada Compelled to Act Sarah Carter, Nanci Langford, 2020-10-02 Compelled to Act showcases fresh historical perspectives on the diversity of women s contributions to social and political change in prairie Canada in the twentieth century including but looking beyond the era of suffrage activism In our current time of revitalized activism against racism colonialism violence and misogyny this volume reminds us of the myriad ways women have challenged and confronted injustices and inequalities The women and their

activities shared in Compelled to Act are diverse in time place and purpose but there are some common threads In their attempts to correct wrongs achieve just solutions and create change women experienced multiple sites of resistance both formal and informal The acts of speaking out of organizing of picketing and protesting were characterized as unnatural for women as violations of gender and societal norms and as dangerous to the state and to family stability Still as these accounts demonstrate prairie women felt compelled to respond to women s needs to challenges to family security both health and economic and to the need for community They reacted with the resources at hand and beyond to support effective action joining the ranks of women all over the world seeking political and social agency to create a society more responsive to the needs of women and their children *Locating Health* Erika Dyck,Christopher Fletcher,2015-10-06 The essays in this collection focus on the dynamic relationship between health and place Historical and anthropological perspectives are presented each discipline having a long tradition of engaging with these concepts The resulting dialogue should produce a new layer of methodology enhancing both fields **"Opium"** John Palmer Gavit,1927 **King Cobra** Harry Hervey,1927 **Calawhite Egg Bulletin** ,1924 **The Smart Set** ,1922 **The Three Religious Leaders of Oxford and Their Movements** Samuel Parkes Cadman,1916 **Western Field** ,1907 **Michigan Dairy Farmer; a Weekly Newspaper Devoted to the Dairy Interests of Michigan** G. H. Brownell,1909 The Country Gentleman ,1913 Michigan Poultry Breeder ,1924 **The Choice of the Highest** Reginald John Campbell,1904 *The Year's Best Mystery & Suspense Stories* ,1995 *Michigan Dairy Farmer* ,1909
