Deadly Dilemmas Deterrence In Us Nuclear Strategy:

Deadly Dilemmas James H. Lebovic, 1990 *The Myth of the Nuclear Revolution* Keir A. Lieber, Daryl G. Press, 2020-06-15 Leading analysts have predicted for decades that nuclear weapons would help pacify international politics. The core notion is that countries protected by these fearsome weapons can stop competing so intensely with their adversaries they can end their arms races, scale back their alliances and stop jockeying for strategic territory. But rarely have theory and practice been so opposed. Why do international relations in the nuclear age remain so competitive? Indeed, why are today's major geopolitical rivalries intensifying? In *The Myth of the Nuclear Revolution*, Keir A. Lieber and Daryl G. Press tackle the central puzzle of the nuclear age: the persistence of intense geopolitical competition in the shadow of nuclear weapons. They explain why the Cold War superpowers raced so feverishly against each other, why the creation of mutual assured destruction does not ensure peace, and why the rapid technological changes of the 21st century will weaken deterrence in critical hotspots around the world. By explaining how the nuclear revolution falls short, Lieber and Press discover answers to the most pressing questions about deterrence in the coming decades: how much capability is required for a reliable nuclear deterrent, how conventional conflicts may become nuclear wars, and how great care is required now to prevent new technology from ushering in an age of nuclear instability.

Deterrence Now Patrick M. Morgan, 2003-04-17 Patrick Morgan's authoritative study revisits the place of deterrence after the Cold War.

Deterring International Terrorism and Rogue States James H. Lebovic, 2007-01-24 This new study challenges the widely held view that many current US adversaries cannot be deterred, maintaining that deterrence is not a relic of the Cold War period and that it should shape US policies toward so-called rogue states and terror groups. James Lebovic argues that deterrence principles continue to apply and focuses upon the three pillars of the Bush administration's national security policy: missile defence, which preoccupied the administration until September 11, 2001; preemption, which became the US focus with the September 11 attacks; and US success in overthrowing the Taliban regime in Afghanistan. Homeland security, which the administration has portrayed as more a natural response to threat than an aspect of policy that must be reconciled with the other pillars, is also addressed. *Deterring International Terrorism and Rogue States* asserts that bad offences and defences have been endemic to the current US policy approach, leading US policy makers to pursue policies that require them to do everything without adequate concern for resource trade-offs, overreach, and unintended consequences. This book will be of great interest to students of US foreign policy, national and international security, terrorism, and international relations in general.

Isolationism Reconfigured Eric Nordlinger, 1996-08-05 This iconoclastic and fundamental work advocates a new variant of isolationism: a national strategy confining US military actions largely to North America and to neighboring sea and air lanes, but encouraging international activism and engagement in nonsecurity realms. In Nordlinger's view, disengaging from security commitments on distant shores would liberate the United States to use its resources and decision-making powers to

act more effectively abroad in matters of economic policy and human rights A national strategy would then become a powerful new method of encouraging international ideals of democracy and isolationism would be freed of its previous associations with appeasement weakness economic protectionism and self serving nationalism Nordlinger draws on the recent historical record to show that a national strategy would have lessened the perils of earlier decades including those of the Cold War While real dangers did exist during this period engaged strategies such as containment too often exacerbated them The United States could have effectively and far less expensively helped to deter Communist aggression in Europe and Asia by encouraging other nations to make larger investments in their own protection Marshaling impressive empirical evidence in defense of a controversial position this final work by a leading scholar of international affairs is essential reading for scholars practitioners and lay readers alike

Foregone Conclusions James H. Lebovic, 2019-04-08 With the end of the Cold War and the erosion of the Soviet threat the United States is reevaluating its defense policy and its acquisition of weapons James Lebovic shows that although current military missions are adapted to post Cold War realities the self defeating bias of bureaucrats and military services toward Cold War weaponry is still prevalent He examines the impact of this bias on the armed services as they assess threat generate requirements develop and change weapon concepts set production rates and engage in testing The author asserts that bias compromises service interests and broader military objectives and he offers general policy recommendations to put U S weapons acquisition on a more effective track
