## **Ddorigof Sec Wor War:**

**The Political Economy of Narcotics** Julia Buxton, 2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies faces entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America s strategic interest As a result US policy approaches emerge as a decisive factor in accounting for the failure of prohibition International Drug Control Law Khalid Tinasti, 2026-01-13 The international drug control regime built on three conventions 1961 1971 and 1988 prohibits non medical drug production and use while ensuring access for medical purposes Despite nearly universal ratification and efforts focused on demand and supply reduction the illegal drug market has expanded with drug use increasing by 20% and problematic use by 45% in just a decade Challenges such as synthetic drug crises the legalization of non medical cannabis in some regions and new trafficking methods like dark web markets have highlighted tensions within the regime and its limits in meeting key objectives This book examines the framework s legal foundations implementation and historical context alongside emerging tensions and their impact on global norms related to health development and human rights It explores whether the regime remains fit for purpose or requires reform assessing existing pathways for change and the implications of maintaining the status quo or of reforming Offering critical insights for policymakers academics and communities International Drug Control Law provides a timely and comprehensive analysis of the modernization of global drug policy in a rapidly shifting landscape **Western Medicine** Irvine Loudon, 1997 From ancient religious rituals and magical incantations to Renaissance practices such as purging bleeding and trepanning to modern day miracles such as

antibiotics CAT scans and organ transplants the advance of Western medicine has been nothing short of astonishing This richly illustrated volume provides a wide ranging history of Western medicine charting the great milestones of medical progress from the birth of rational medicine in the classical world right up to the present day The history begins in ancient Greece where medical practice under the auspices of Hippocrates and others first looked past supernatural explanations and began to understand disease as a product of natural causes It chronicles the slow growth of medical knowledge through the Middle Ages and the Renaissance illuminating the work of figures such as Paracelsus Vesalius and William Harvey who explained how blood circulates through the body And it provides portraits of more modern figures like Louis Pasteur and Robert Koch the fathers of bacteriology Wilhelm Roentgen the discoverer of x rays and Paul Ehrlich who pioneered the use of chemicals to destroy disease causing organisms Authoritative informative and beautifully designed this volume offers a truly fascinating introduction to medicine in the West
