De Havilland Mosquito Edward Shacklady, 2005-10. The de Havilland Mosquito was the non-conformist among aircraft of World War Two as its ingenious wooden construction was revolutionary. Like most of the world's greatest combat aircraft, the Mosquito owed nothing to official sponsorship and its appearance relied totally on the dogged perseverance of its designers, Geoffrey de Havilland and C. C. Walker. Conceived originally in 1938 as a fast, highly maneuverable yet unarmed day bomber, the Mosquito did not get official recognition until March 1940 when an order for fifty was given by the British Air Ministry. It soon proved to be an outstanding aircraft and quickly established a reputation for excellent flying qualities, an unequalled talent for destroying pinpoint targets, and for having by a large margin the lowest loss rate of any aircraft in service with Bomber Command. Its versatility made it unique, and the Mosquito was successful in such varied roles as a high and low level day and night fighter, long range day and night fighter, fighter bomber, minelayer, pathfinder, rocket armed ground attack, and high and low level photo reconnaissance aircraft.

De Havilland Mosquito, Vol. 2 Ron Mackay, 2021-08-28. This second of two volumes on de Havilland's Wooden Wonder covers the World War II bomber and photoreconnaissance variants of the deadly Mosquito. Along with its night fighter and fighter bomber variants, Mosquito bomber squadrons attacked the enemy around the clock. Pinpoint assaults on specialist targets were another aspect of Mosquito operations, whose destructive effect on the Axis was constantly felt. Also featured in this volume is the Mosquito's operational service between 1942 and 1945 within the ranks of the RAF, Commonwealth air forces, and US Army Air Force, as well as postwar use.

Dh.98 Mosquito in Action - Op RON. MACKAY, 2017-08-29. A World War II forerunner of the modern multi-role combat aircraft, the De Havilland Mosquito was conceived as a fast, light warplane that could out-run and out-climb enemy aircraft and therefore could dispense with heavy armament. Known as the Wooden Wonder, the Mosquito was constructed almost entirely of wood, and when it entered

production in 1941 was one of the fastest aircraft in the world The Mosquito made its debut in its first widespread role as a fast high altitude photo reconnaissance PR aircraft a job it continued to perform until the end of WWII American General Hap Arnold requested and received a number of Mosquitos for use by the U S Army Air Forces Meanwhile the versatility of the Mosquito led the Light Night Strike Force LNSF to begin employing the wooden craft alongside heavy bombers for raids over the Reich Mosquitos dropped 4 000 pound Cookie bombs in lightning raids inside the German homeland in a de facto pay back for the German Blitz and Mosquito Fighter Bombers FB carried out strikes on German security points and U Boats In addition to operations over Nazi occupied Europe Meanwhile British RAF and Australian RAAF crews took the multi role Mosquito into combat against the Japanese in the South East Asian theatre Get an up close but comprehensive look at the De Havilland Mosquito with this new title illustrated with more than 180 photographs two dozen of them in color plus a table color profiles and detailed line drawings **Modelling the De Havilland Mosquito** Roy Sutherland,2012-07-20 Featuring a variety of kits and colour schemes shown this is a detailed guide to modelling one of the best twin engined aircraft of its size to see action in World War II The addition of radar turned the Mosquito into the RAF s premier night fighter and it achieved great success in the defence of Britain with some 600 raiders and 600 V1 rockets falling to its guns between 1942 and 1945 The design s superb performance and ability to escape interception by enemy fighters also made the Mosquito the ideal choice for the RAF s photographic reconnaissance force Learn to model this legendary all wooden aircraft in its wide range of roles across multiple theatres and air forces De Havilland Mosquito, Vol. 1 Ron Mackay,2019-10-28 This first of two volumes on de Havilland s Wooden Wonder covers the night fighter and fighter bomber variants of the deadly Mosquito The development of the multirole Mosquito from its original bomber and photoreconnaissance operational function to that of a night fighter and fighter bomber configuration was initiated by the latent threat of a renewal of the 1940 41 Blitz Over the ensuing years of WWII the Mosquito attacked the enemy with sorties across a 24 hour time span challenging the German Nachtjagd with aerial interceptions as well as attacks on Luftwaffe airfields Pinpoint assaults on specialist targets was another aspect of Mosquito fighter bomber operations whose destructive effect on the Axis was constantly felt Also covered are the Mosquito s operations with the Fleet Air Arm as well as postwar use Part of the Legends of Warfare series **De Havilland Mosquito** Malcolm V.
