Figuris Et Latinitate Donatus a Florentio Schuyl. Without the "Tractatus de Formatione Foetus." With Plates.** René Descartes,1662 Catalogue of the Aristotelian and Philosophical Portions of the Library of the Late Henry William Chandler ,1891 *Dutch Cartesianism and the Birth of Philosophy of Science* Andrea Strazzoni,2018-11-19 How did the relations between philosophy and science evolve during the 17th and the 18th century This book analyzes this issue by considering the history of Cartesianism in Dutch universities as well as its legacy in the 18th century It takes into account the ways in which the disciplines of logic and metaphysics became functional to the justification and reflection on the conceptual premises and the methods of natural philosophy changing their traditional roles as art of reasoning and as science of being This transformation took place as a result of two factors First logic and metaphysics which included rational theology were used to grant the status of indubitable knowledge of natural philosophy Second the debates internal to Cartesianism as well as the emergence of alternative philosophical world views such as those of Hobbes Spinoza the experimental science and Newtonianism progressively deprived such disciplines of their foundational function and they started to become forms of reflection over given scientific practices either Cartesian experimental or Newtonian A Catalogue of Seventeenth Century Printed Books in the National Library of Medicine National Library of Medicine (U.S.),1989 **Burchard de Volder and the Age of the Scientific Revolution** Andrea Strazzoni,2019-11-18 This monograph details the entire scientific thought of an influential natural philosopher whose contributions unfortunately have become obscured by the pages of history Readers will discover an important thinker Burchard de Volder He was instrumental in founding the first experimental cabinet at a European University in 1675 The author goes beyond the familiar image of De Volder as a forerunner of Newtonianism in Continental Europe He consults neglected materials including handwritten sources and takes into account new historiographical categories His investigation maps the thought of an author who did not sit with an univocal philosophical school but critically dealt with all the major philosophers and scientists of his age from Descartes to Newton via Spinoza Boyle Huygens Bernoulli and Leibniz It explores the way De Volder s un systematic thought used rejected and re shaped their theories and approaches In addition the title includes transcriptions of De Volder s teaching materials disputations dictations and notes Insightful analysis combined with a trove of primary source material will help readers gain a new perspective on a thinker so far mostly ignored by scholars They will find a thoughtful figure who engaged with early modern science and developed a place that fostered experimental philosophy **A Tribute to Adam Politzer** A.
