De Musica Verballi Libri Duo Twos On Verbal Music:

De Musica Verballi Libri Duo Gaspar Stoquerus, 1570-01-01 Gaspar Stoquerus's treatise *De musica verballi* ca 1570 is the only Renaissance treatise as yet discovered that is devoted entirely to the problem of text placement in vocal polyphony. Salient portions of Stoquerus's treatise were first discussed in 1961 by Edward E. Lowinsky and a more detailed synthesis of Stoquerus's treatise is contained in one chapter of Don Harran's *Word Tone Relations in Musical Thought from Antiquity to the Seventeenth Century* 1986. The present volume of *Greek and Latin Music Theory* offers the first critical edition of Stoquerus's entire treatise preceded by an extensive introduction and accompanied by a translation and annotations facing the Latin text. Indexes of terms, names and subjects are also included. The critical edition of the text provides a precise reading and comprehension of its contents while the translation enables readers to examine more closely the contents of the entire treatise especially Stoquerus's contextual arguments justifying his subject in general and his fifteen rules for text placement in particular. The introduction and annotations reveal Stoquerus's immersion in his historical milieu as a scholar, humanist and pedagogue. As a pedagogue in particular Stoquerus is deeply immersed in the scholastic method of argumentation and advances his thought with precision and logic culminating in his closely reasoned set of fifteen rules for text placement and a simplification of the Guidonian method of solmization already in progress in Renaissance choir instruction books. This volume offers the first critical edition of Stoquerus's entire treatise the only Renaissance treatise as yet discovered that is devoted entirely to the problem of text placement in vocal polyphony. Also included are an extensive introduction, a translation and annotations facing the Latin text and indexes of terms, names and subjects. [Companion to Medieval and Renaissance Music](#) Tess Knighton, David Fallows, 1997. With contributions from a range of internationally known early music scholars and performers, Tess Knighton and David Fallows provide a lively new survey of music and culture in Europe from the beginning of the Christian era to 1600. Fifty essays comment on the social, historical, theoretical and performance contexts of the music and musicians of the period to offer fresh perspectives on musical styles, research sources and performance practices of the medieval and Renaissance periods. **City Culture and the Madrigal at Venice** Martha Feldman, 2023-11-15. Martha Feldman's exploration of sixteenth-century Venetian madrigals centers on the importance to the Venetians of Ciceronian rhetorical norms which emphasized decorum through adherence to distinct stylistic levels. She shows that Venice easily adapted these norms to its long-standing mythologies of equilibrium, justice, peace and good judgment. Feldman explains how Venetian literary theorists conceived variety as a device for tempering linguistic extremes and thereby maintaining moderation. She further shows how the complexity of sacred polyphony was adapted by Venetian music theorists and composers to achieve similar ends. At the same time, Feldman unsettles the kinds of simplistic alignments between the collectivity of the state and its artistic production that have marked many historical studies of the arts. Her rich social history enables a more intricate dialectics among sociopolitical formations, the roles of individual printers

academists merchants and others and the works of composers and poets City Culture offers a new model for situating aesthetic products in a specific time and place one that sees expressive objects not simply against a cultural backdrop but within an integrated complex of cultural forms and discursive practices Martha Feldman's exploration of sixteenth century Venetian madrigals centers on the importance to the Venetians of Ciceronian rhetorical norms which emphasized decorum through adherence to distinct stylistic levels She shows that Venice easily adapted to

Patterns in Play Graeme MacDonald Boone, 1999-01-01 The relationship between text and music is a central issue in fifteenth century music studies Decades of research and performance have failed to provide clear answers to the most basic questions such as which notes go with which syllables and why *Patterns in Play* focuses on the early French songs of Guillaume Dufay and proposes a basis for determining some rules of common procedure for interpreting both underlay and style Graeme M Boone examines questions of rhythm and declamation considering mensuration linguistic and poetic prosody and prosody in song The first three chapters comprise a set of discussions preliminary to close rhythmic analysis of Dufay's texted song melodies Beginning with mensural rhythm and proceeding to poetics and the relationship between Dufay's poetic and musical rhythms and musical declamation Boone examines the musical features of rhythm melody tonal organization counterpoint text setting and text expression Offering fresh insight into the issues he raises Boone clarifies the relationship between underlay and style and provides a better understanding of the technical and aesthetic issues that Dufay and other composers faced in weaving their patterns of song
