**Philistines** Hilton Kramer, 2007-09-12 Analyzes the works of a variety of modern artists including Edward Hopper Louise Nevelson Chuck Close and Julian Schnabel **De Stijl, 1917-1931** Hans Ludwig C. Jaffé, 1956 *De Stijl, the Formative Years, 1917-1922* Carel Blotkamp, 1986 These nine essays provide a biographically vivid and pluralist view of the periodical De Stijl in the important early period of its development They provide new biographical information and fresh analysis of the painters van Doesburg Mondrian Vilmos Huszar and Bart van der Leek the painter sculptor Georges Vantongerloo architects Oud Robert van t Hoff Jan Wits and furniture designer turned architect Gerrit Rietveld Carel Blotkamp is Professor of Art History at the Free University of Amsterdam **Mathematics and Art** Lynn Gamwell, 2016 This is a cultural history of

mathematics and art from antiquity to the present Mathematicians and artists have long been on a quest to understand the physical world they see before them and the abstract objects they know by thought alone Taking readers on a tour of the practice of mathematics and the philosophical ideas that drive the discipline Lynn Gamwell points out the important ways mathematical concepts have been expressed by artists Sumptuous illustrations of artworks and cogent math diagrams are featured in Gamwell's comprehensive exploration Gamwell begins by describing mathematics from antiquity to the Enlightenment including Greek Islamic and Asian mathematics Then focusing on modern culture Gamwell traces mathematicians' search for the foundations of their science such as David Hilbert's conception of mathematics as an arrangement of meaning free signs as well as artists' search for the essence of their craft such as Aleksandr Rodchenko's monochrome paintings She shows that self reflection is inherent to the practice of both modern mathematics and art and that this introspection points to a deep resonance between the two fields Kurt Godel posed questions about the nature of mathematics in the language of mathematics and Jasper Johns asked What is art in the vocabulary of art Throughout Gamwell describes the personalities and cultural environments of a multitude of mathematicians and artists from Gottlob Frege and Benoît Mandelbrot to Max Bill and Xu Bing Mathematics and Art demonstrates how mathematical ideas are

embodied in the visual arts and will enlighten all who are interested in the complex intellectual pursuits personalities and cultural settings that connect these vast disciplines *Arts & Humanities Citation Index* ,1991 Making Dystopia James Stevens Curl,2018-08-23 In Making Dystopia distinguished architectural historian James Stevens Curl tells the story of the advent of architectural Modernism in the aftermath of the First World War its protagonists and its astonishing almost global acceptance after 1945 He argues forcefully that the triumph of architectural Modernism in the second half of the twentieth century led to massive destruction the creation of alien urban landscapes and a huge waste of resources Moreover the coming of Modernism was not an inevitable seamless evolution as many have insisted but a massive unparalleled disruption that demanded a clean slate and the elimination of all ornament decoration and choice Tracing the effects of the Modernist revolution in architecture to the present Stevens Curl argues that with each passing year so called iconic architecture by supposed star architects has become more and more bizarre unsettling and expensive ignoring established contexts and proving to be stratospherically remote from the aspirations and needs of humanity In the elite world of contemporary architecture form increasingly follows finance and in a society in which the haves have more and more and the have nots are ever more marginalized he warns that contemporary architecture continues to stack up huge potential problems for the future as housing costs spiral out of control resources are squandered on architectural bling and society fractures This courageous passionate deeply researched and profoundly argued book should be read by everyone concerned with what is around us Its combative critique of the entire Modernist architectural project and its apologists will be highly controversial to many But it contains salutary warnings that we ignore at our peril And it asks awkward questions to which answers are long overdue
