De Havilland Comet The Worlds First Jet Airliner:

Comet! Graham M. Simons, 2013-11-14 A masterpiece of the most diligent research and extraordinary detail and surely represents the definitive study of the Comet a terrific book Royal Aeronautical Society This volume from the respected and well regarded aviation historian and author Graham Simons is a solid book of such scope that you ll probably consult it for a lot more than just Comet material SpeedReaders info Extensively illustrated throughout Comet features details lifted directly from enquiry and salvage reports much of which have never been published before and offers a unique insight into the failures and tragedies that blighted the early days of development laying down lessons that were ultimately to benefit later designs As part of his research into the book the author met and interviewed Harry Povey the De Havilland Production Manager and John Cunningham the Comet test pilot who would be the first to experience flight at the helms of the iconic craft Both of these first hand accounts are relayed in the book adding a deeper sense of authenticity and a more personalized account of proceedings than facts and reports alone are able to achieve Attention is also paid to the derivative Nimrod design and the book features an interview that the author conducted with the aircraft commander of the last ever Nimrod operational flight Interviews of this kind are supplemented by the author s own narrative of proceedings setting personal experience within historical context and exploring the themes and historical topics that the interviews evoke An outstanding account of the life of the Comet all readers will find inspiration and achievement in the tale Firetrench **De Havilland Comet** R. E. G. Davies, Philip Birtles, 1999 July 27th 1999 is the 50th anniversary of the first flight of the de Havilland DH 106 Comet airliner This tribute volume marks the inauguration of the commercial Jet Age by the British Overseas Airways Corporation BOAC *De Havilland Comet* J. G. Cowell, **De Havilland Comet** Colin Higgs, 2018-11-30 A first rate review of the history of the world s first commercial jetliner its early difficulties and their rectification Firetrench The world got a little smaller in July 1949 when the first jet powered airliner took to the skies barely four years after the end of the Second World War Not only was the de Havilland Comet 1 was a lot faster than previous airliners but it could also fly higher and further It was packed with new technology but perhaps most importantly for those early passengers it was a quiet luxurious and even pleasant experience something that could never be said for the noisy piston engine aircraft that came before The Comet s leadership in jet travel for the future was assured until aircraft began crashing The first ones were put down to pilot error but two disastrous events in 1954 grounded the fleet and Britain s advantage over the rest of the world was lost Boeing caught up with its ubiquitous 707 and the Comet was destined to become but a memory However rising from the ashes came a new Comet one that was bigger and more powerful than before and designed for completely different roles Where the first Comets had provided an expensive and plush way to travel for the rich few the new Comet 4s carried more passengers to a multitude of destinations inevitably becoming key carriers for the early package holidaymakers At the same time they became vital strategic transports for the RAF as the British Empire receded This book tells the full story of the world s first

jet powered airliner from its remarkable beginnings through its early flight trials programme to its entry into service The type s military career is also covered as is its construction also included in this volume are details of the numerous variants produced and those still surviving as exhibits today **First Jet Airliner** Timothy Walker, Scott Henderson, 2000 This work provides a history of the first civil jet transport to be designed built and to enter world service It includes a close up detail section for modellers and specially commissioned colour profiles introduce each chapter **De Havilland DH.106 Comet** Wolfgang Borgmann, 2024-04-28 This book is the perfect addition to the A Legends of Flight Illustrated History series As the first jetliner operated in scheduled service the de Havilland Comet is a very important aircraft type in airline history It set the standards for modern air transport and is therefore a MUST for this book series D.H. Comet J. Graham Cowell, 1999*

De Havilland Comet Kev Darling, 2001 This series provides the enthusiast with a first ever look at the structure design systems and operation of these high tech wonders of the air Contains engineering drawings tech manual excerpts exploded views overhaul handbooks cockpit photos pilot manual excerpts factory assembly photos and more **The British Aircraft Industry and American-led Globalisation** Takeshi Sakade, 2021-12-09 Sakade challenges the narrative that the focus of British manufacturing went from Empire to Europe and argues rather that following the Second World War the key relationship was in fact trans Atlantic There is a commonly accepted belief that during the twentieth century British manufacturing declined irreparably that Britain lost its industrial hegemony But this is too simplistic In fact in the decades after 1945 Britain staked out a new role for itself as a key participant in a US led process of globalisation Far from becoming merely a European player the UK actually managed to preserve a key share in a global market and the British defence industry was to a large extent successfully rehabilitated Sakade returns to the original scholarly parameters of the decline controversy and especially questions around post war decline in the fields of high technology and the national defence industrial base Using the case of the strategically critical military and civil aircraft industry he argues that British industry remained relatively robust A valuable read for historians of British aviation and more widely of 20th century British Industry

Britain's Glorious Aircraft Industry J Paul Hodgson, 2021-03-03 The rich and diverse history of the British aircraft industry is captured in superb detail by the author in this weighty tome Aviation News Great Britain s aircraft industry started in 1908 with the first formally registered organization in the world to offer to design and build an aeroplane for commercial gain This book tells the complete story of the 110 years since the start all the companies formed and the aircraft they produced highlighting the advances in aeronautical ambition and technology It is the story of the creation survival and decline of all one hundred and twenty three of the aircraft design and construction companies formed between 1908 and 2018 The exhilaration of success and the magic of aviation technology are vividly illustrated by the technical and political birth stories of iconic projects such as the Cirrus Gypsy Moths the Tiger Moth the flying boats of Imperial Airways Spitfire Lancaster Viscount Vulcan Harrier Buccaneer and many more The rotary wing industry is not forgotten The birth of the jet turbine

engine and the quest for supersonic speed is included The stories of the disappointments of failure and disaster such as the Brabazon Comet Princess Rotodyne and TSR 2 and the growth of international collaboration in Concorde Tornado Airbus Eurofighter Typhoon and other projects are included in the context of the international scene and domestic politics The conclusion highlights the prominent reminiscences and speculates on the future of the aircraft industry in Britain An outstanding reference book and a thoroughly enjoyable canter through the decades from the days of wood and fabric to the modern composite structure of the wings of the A400 Atlas RAF Historical Society **Secret Wings of World War II** Lance Cole,2015-06-30 There are many myths and legends surrounding the advanced German aeronautical technology of the Second World War There are also facts and proven events Yet within these stories and behind these facts lie conspiracy theories mistaken assumptions and denials that seem to contradict the evidence So what really happened How far ahead were the German scientists And of even greater interest why and how There have been other books about advanced German wartime aeronautics yet few authors have fully examined the detail of the designs and their relevance to the fighter and bomber legends of the 1950s and 60s let alone the current crop of military and civil all wing or blended wing aircraft This book charts the story from its origins through current day innovations and beyond into the all wing future of tomorrow

Boeing 707 Group Graham M. Simons,2020-01-24 A definitive look at the plane that revolutionized air travel and its place in aviation history from the author of Comet The World's First Jet Airliner The Boeing 707 family that includes the forerunner Model 367 80 the KC 135 series of military transports and the slightly smaller Model 720 was the pioneer of the sweptback wing incorporating podded engines borrowed from the B 47 military bomber It was the aircraft that many regard as the design that really ushered in the Jet Age This book from the established aviation historian Graham Simons examines the entire course of the Boeing 707's history charting an impressive design evolution and illustrating the many ways in which the 707's legacy continues to be felt to this day In laying the foundation for Boeing's preeminence on the world's jetliner market during the 1980s and 90s the 707 paved the way for future innovations in both civilian and military fields and Graham Simons has put together an image packed history that records the historic and landmark milestones of this iconic aircraft type The book is well worth the price and will provide many hours of intriguing reading and research support It is a good addition to one's aviation bookshelf Air Power History An impressive volume that is well written and easy to read Its research is of a high standard It will of course appeal to Boeing 707 C 135 enthusiasts and as such could well become a Standard Reference Work on its subject NZ Crown Mines **Flight** R.G.
