**Internet Research, Theory, and Practice** Cathy Fowley, Sylvie Thouësny, Claire English, 2013-05-17 From 2000 to 2012 the number of Internet users rose from less than 0.4 billion to 2.4 billion. Scholarly evidence based Internet research is of critical importance. The field of Internet research explores the Internet as a social, political, and educational phenomenon providing theoretical and practical contributions to understanding and informing practice, policy, and further research. This new collection is a unique and welcome work. The editors have compiled a diverse range of new scholarly peer reviewed research spanning the fields of education, arts, the social sciences, and technology. The authors provide academic perspectives both theoretical and practical on the Internet and citizenship, education, employment, gender, identity, friendship, language, poetry, literature, and more. The collection comprises a rich resource for researchers and practitioners alike. Following Notes on Contributors, Acknowledgements, a Foreword, and Introduction on Internet Research, Theory and Practice, Perspectives from Ireland, Cathy Fowley, Claire English, and Sylvie Thouësny, the following sections and papers are included: Section 1: Research and Reflections on Ethics and Digital Culture. 1. **Youtube in the Language Classroom** Sebastian Altenhoff, 2011-02 Seminar paper from the year 2009 in the subject Didactics for the subject English Pedagogy Literature Studies grade 1.0 University of Duisburg Essen Anglophone Studien language English abstract According to Ellis learning a language means making use of the language in R. Schoff Wolff 1999: 54 This not only implies the claim of free spontaneous communication but also of dealing with and of experiencing the target language as such The claim of experiencing the target language in the language classroom leads to a growing interest in the quality of the materials used According to Wolff 1998 any kind of learning no matter whether verbal or non verbal has to be embedded in a rich learning environment that has not been reduced concerning its complexity Authenticity is thus one of the main criteria in order to evaluate the quality of materials This criterion applies to all materials such as literature that have not been changed for the purpose of teaching and learning of course In this thesis however using authentic video in the language classroom will be considered and analysed according to its didactic benefits Integrating video in the language classroom does not necessarily mean having to watch and to analyse a whole film of ninety minutes Thanks to Web 2.0 applications such as YouTube the accessibility of short video clips advertisements or film excerpts has become very simple Because of the growing popularity of this webpage and of

integrating Web 2.0 applications in the learning environments in general my entire analysis will relate to videos taken from YouTube This thesis aims to provide both a theoretical part I and a practical investigation part II of the topic in order to create a framework for analysis I will first of all give a short overview of the didactic benefits of integrating authentic video in the language classroom in general This survey is followed by a short description of the basic ideas of YouTube
