Education in the Structure of the Social and Investment Model of Economic Growth: Scenarios of Development and Mechanisms of Management Elena G. Popkova,2024-08-12 The importance of the formation of a socially oriented market economy grew due to the adoption of the global goals in the sphere of sustainable development For practical implementation of this idea in the modern economic systems there s a necessity for a new social and investment model of economic growth The essence and the main difference of this model from the traditional model of economic growth are the sources of growth are social investments investments in humans and an increase in the population s quality of life

Digital Transformation for Business Sustainability and Growth in Emerging Markets Sumesh Dadwal,Pawan Kumar,Rajesh Verma,Sunil Kumar,2025-02-21 Digital Transformation for Business Sustainability and Growth in Emerging Markets explores the rich context of emerging markets which present unique challenges for digital transformation including cultural differences limited access to technology and regulatory hurdles in emerging markets

End-to-End Strategy Execution Charles F. Bowman,William M. Ulrich,2025-12-10 Despite technological and methodological advancements strategy execution failure remains alarmingly common Most projects fail outright or face significant challenges a statistic that has remained consistent for more than two decades While 80% of business leaders believe their companies excel at crafting strategy only 44% believe their organizations can achieve their strategic goals Nine out of ten leaders admit their execution failures have resulted in missed market opportunities These initiatives that fell short of expectations and ROI have wasted hundreds of billions of dollars Organizations continue this cycle of failure by repeatedly investing in new methodologies third party software systems integrators or silver bullet technologies expecting different results This suggests a fundamental abdication of ownership and responsibility for effective strategy execution Too many organizations fall into the trap of blind loyalty to specific methodologies sometimes abandoning proven practices and even strategic planning itself

While various methodologies offer valuable elements leadership must maintain intellectual oversight rather than delegating accountability to third parties with limited stake in long term success End to End Strategy Execution From Inception Through Solution Deployment presents a framework for change to break this cycle of failure This framework is effective because it is methodology agnostic but not methodology illiterate This means it incorporates valuable elements from various approaches while maintaining a cohesive structure that connects strategy formulation to solution deployment This end to end strategy execution framework provides an actionable roadmap covering Strategy formulation Impact assessment Business and IT architecture design Initiative scoping and prioritization Design driven solution deployment Unlike previous frameworks claiming to be end to end this approach incorporates the rigor and integration capabilities needed to deliver on its promise aligning best practices and technologies to streamline every action from strategy to implementation Because the framework addresses every aspect of strategy execution this book is a must read for everyone involved in strategy formulation analysis design and deployment It enables all strategic stakeholders and contributors to understand the scope and extent of their responsibilities as well as the tasks required to deliver any strategic solution on time and within budget
