Early Intervention For Infants And Children With Handicaps An Empirical Base:

Early Intervention for Infants and Children with Handicaps Samuel L. Odom, Merle B. Karnes, 1988 Ellis'
Handbook of Mental Deficiency, Psychological Theory and Research William E. MacLean Jr., 2012-12-06 In the 16 years since the publication of the second edition of this volume psychological theory and research in mental retardation has continued to expand and extend scientific theoretical and clinical understanding of this most complex and challenging human condition. Explicit effort has been made to translate theory and research into useful and efficacious assessment, intervention, prevention, and policy actions. This third edition provides an opportunity to critique major conceptual developments and empirical research in an effort to stimulate further behavioral research of practical social importance. The Handbook presents work by prominent contributors to a major scientific endeavor that has grown dramatically during the last three decades. The challenge for each author was to identify important theoretical and empirical issues, provide a critical selective review of exemplary research, and discuss the questions that remain unanswered in each area. In short, the goal for this third edition was to consolidate the knowledge gained during the past 30 years and to present a blueprint for future research in mental retardation, the broader field of learning disabilities, and other developmental disorders such as autism. Providing totally different coverage and direction from the previous edition, this text fills a crucial instructional need in graduate courses related to the psychology of mental retardation. With its emphasis on psychological research and theory, it offers an important alternative to many available texts that primarily emphasize the application of research. *Enduring Issues In Special Education* Barbara Bateman, John W. Lloyd, Melody Tankersley, 2015-02-20 *Enduring Issues in Special Education* is aimed at any course in the undergraduate or graduate special education curriculum that is wholly or partly devoted to a critical examination of current issues in special education. The book organizes 28 chapters into seven sections using familiar structuring principles: what, who, where, how, when, why, and whither. Each section begins with an introduction that provides historical, legal, and theoretical background information and organizing commentary for the chapters that follow. The book's objective, in addition to informing readers about the issues, is to develop critical thinking skills in the context of special education. Key features include the following: **Dialectic Format** Each of the 28 chapters presents compelling reasons for addressing the issue at hand and specific ways to do so. Because each issue is written from different perspectives and focuses on a variety of aspects, readers are encouraged to weigh the arguments, seek additional information, and come up with synthesized positions of their own. **Organizing Framework** The book's seven sections have been arranged according to a scheme that is the essence of most investigative reporting and provides a coherent, easy-to-understand framework for readers. **Expertise** All chapters are written by leading scholars who are highly regarded experts in their fields and conclude with suggested readings and discussion questions for additional study. *Early Intervention/early Childhood Special Education* Samuel L. Odom, Mary E. McLean, 1996 An Activity-based Approach to Early Intervention Diane D. Bricker, Kristie

Pretti-Frontczak, Natalya McComas, 1998 *An Activity Based Approach to Early Intervention* Second Edition is an ideal text for undergraduate and graduate students of early intervention special education and child development and it serves as a practical in service resource for program administrators therapists interventionists and other members of transdisciplinary teams
