**Atmospheric Physics** Richard A Lindzen, 1990-06-29 Motion is manifest in the atmosphere in an almost infinite variety of ways In Dynamics in Atmospheric Physics Dr Richard Lindzen describes the nature of motion in the atmosphere develops fluid dynamics relevant to the atmosphere and explores the role of motion in determining the climate and atmospheric composition The author presents the material in a lecture note style and the emphasis throughout is on describing phenomena that are at the frontiers of current research but due attention is given to the methodology of research and to the historical background of these topics The author's treatment and choice of topics is didactic Problems at the end of each chapter will help students assimilate the material In general the discussions emphasize physical concepts and throughout Dr Lindzen makes a concerted effort to avoid the notion that dynamic meteorology is simply the derivation of equations and their subsequent solution His desire is that interested students will delve further into solution details The book is intended as a text for first year graduate students in the atmospheric sciences Although the material in the book is self contained a familiarity with differential equations is assumed some background in fluid mechanics is helpful Atmosphere, Ocean and Climate Dynamics John Marshall, R. Climate Dynamics of the Tropics S. Hastenrath, 2012-12-06 The first edition of my book Climate and Circulation of the Tropics was reasonably up to date to the middle of 1985 In a second printing in 1988 it was possible to complete a few literature references and to correct some misprints However vigorous research has taken place over the past five years in various areas of tropical climate dynamics especially in the atmosphere ocean mechanisms of climate anomalies climate prediction ocean circulation and paleoclimates Promising progress has also been made in the application of general circulation modelling to tropical climate problems In the present second edition named Climate Dynamics of the Tropics I have attempted to incorporate much of the recent work to late 1990 Chapters 8 and 9 have been essentially re written and major additions have been made to Chapters 4 and 12 in particular I would like to acknowledge the continued support by the U S National Science Foundation over the past five years B Parthasarathy Poona and H Lessmann San Salvador sent me updates of data series not easily accessible I have benefitted from discussions with numerous colleagues in the United States and overseas In the preparation of this second edition Marilyn Wolff patiently transferred my illegible hand written drafts onto word processor Dierk Polzin and Dan Skemp assisted me with the creation of the page masters and the subject index and Christopher Collimore with the author index
