Early Lectures Of Ralph Waldo Emerson:

The Selected Lectures of Ralph Waldo Emerson Ralph Waldo Emerson, 2005 This is the first and only comprehensive selection of lectures by Ralph Waldo Emerson his era's most prominent American man of letters and one of the foremost architects of our intellectual culture Based on authoritative texts selected and edited by Ronald A Bosco and Joel Myerson the most experienced Emerson editors working today these twenty five addresses collectively exemplify the lecture style for which Emerson was famed in his day Best known to his contemporaries as a lecturer Emerson delivered some 1 500 addresses over the course of his career Because his most important ideas were worked out in his lectures they provide the best record we have of his evolving thought and thus are a key to our understanding of his essays and other printed works Gathered here are lectures on American culture literary theory and aesthetics moral and as Emerson called it intellectual philosophy and social and political reform They are taken from speaking engagements in the United States and the British Isles over the period 1833 1871 during which Emerson often spent four to six months a year on the lecture circuit lectures from the earliest years of Emerson's career 1833 1842 have been newly edited for this volume The volume's introduction draws on contemporary accounts to describe Emerson's idiosyncratic but utterly memorable manner of speaking A headnote provides context to the composition and delivery of each lecture and footnotes identify Emerson's allusions to persons places occasions quotations and books By examining his lectures and how they were delivered say Bosco and Myerson we can look into the laboratory of Emerson's intellectual and compositional process and see his published writings gestating

The Early Lectures of Ralph Waldo Emerson Ralph Waldo Emerson, 1966 *The Early Lectures of Ralph Waldo Emerson* Ralph Waldo Emerson, 1964 Early Lectures of Ralph Waldo Emerson: 1836-1838 Ralph Waldo Emerson, 1959 The notable link between Ralph Waldo Emerson's journals and his essays is formed by the lectures that reflected his developing views on issues of his time This second volume of a welcome edition of the early lectures follows the earlier experimental series of lectures and presents the works of Emerson the now professional lecturer who revealed to his audience central ideas and themes which later crystallized into Essays First Series The Philosophy of History a series of 12 lectures explores the nature of man in his society past and present and singles out the individual as the center of society and history A second series of 10 lectures on Human Culture begins with the duty and the right of the individual to cultivate his powers and proceeds to consider various means by which this cultivation can be accomplished The occasional Address on Education which Emerson delivered between these two series may be seen as a link between them Of the twenty three lectures in this volume only three have been previously published The lectures have been reproduced from Emerson's manuscripts approximating as nearly as possible the original version read by the author to his audience

The Early Lectures of Ralph Waldo Emerson: ed. by S.E. Whicher, R.E. Spiller, and W.E. Williams; Vol. 3, 1838-1842; ed. by R.E. Spiller and W.E. Williams Ralph Waldo Emerson, 1964 Famous first as a lecturer Ralph Waldo Emerson molded his books on the rostrum The

notable link between Ralph Waldo Emerson's journals and his essays is formed by the lectures that reflected his developing views on issues of his time. Yet relatively few of his hundreds of lectures have ever been published. Now in a projected series of three volumes the complete surviving lectures of Emerson's earlier years are made available. In a readable and critical text these volumes will establish an important step in Emerson's creative process that which lies between the notes jotted down in the journals and the finished text of the essays as prepared for print. The lectures more sustained and organized than the journals and fresher and more direct than the essays represent the vital missing middle panel in the total picture of Emerson's literary achievement. It is in the early lectures' fruits of those vigorous and formative years that we find the first ordering of his journal thoughts. To see his mind at its most sustained activity in these crucial few years when he was first exploring his own proper world of thought and growing with a sense of power and hope we need above all to have the complete original texts of the lectures. The lectures are the immediate source of much in his essays whose composition cannot be understood without them. As important in their own right as either journals or essays the lectures also have a coordinate interest and should be studied with the other two forms of his writing. The editors have supplied extensive textual and informational notes invaluable for an intelligent reading of material originally intended for oral communication.

In July 1839 Emerson wrote in his journal: "A lecture is a new literature only then is the orator successful when he is himself agitated; is as much a hearer as any of the assembly. In that office you may shall yet see the electricity part from the cloud; shine from one part of heaven to the other." In this final volume of the early lectures we see the mature lecturer directing himself toward that eloquence to which he aspired and finding a new vocation. With these lectures ten from the series *Human Life*, nine from the series *The Present Age*, the *Address to the People of East Lexington*, and two surviving lectures from the series *The Times*, Emerson produced virtually all his earned income from 1838-1842. The volume includes a biographical and critical introduction. A comprehensive index has been carefully prepared for the three volumes.

The long-awaited final volumes of Emerson's lectures. The past several decades have witnessed an extraordinary editorial reconstruction of the life and influence of Ralph Waldo Emerson, one of America's foremost writers and intellectuals. By drawing primarily from previously unpublished manuscripts in the Ralph Waldo Emerson Memorial Association Collection in the Houghton Library at Harvard University, recent editions of Emerson's correspondence, journals, and notebooks, sermons, and early lectures have provided authoritative texts that inspire readers to consider Emerson's place in American culture afresh. Drawn from the last

untapped body of Emerson's manuscripts *The Later Lectures of Ralph Waldo Emerson 1843-1871* presents the texts of forty seven complete and unpublished lectures that Emerson delivered during the crucial middle years of his career. They offer Emerson's thoughts on subjects that occupied him throughout his life: New England and Old World history and culture, poetic theory, education, the history and uses of intellect, as well as his ideas on subjects that sparked as many debates in the nineteenth century as they do today: race relations and women's rights. *The Early Lectures* Ralph Waldo Emerson, 1966
