Rethinking Work Rishad Tobaccowala, 2025-02-04 A sea change is occurring a change so monumental that it is making us re invent the traditional ideas of where work is done when work is done why work is done and even what work itself is We have a choice We can either be reactive and struggle to adjust to transformational events on the fly or we can be proactive and control the narrative reinventing work to align with the evolving environment Futurist

Rishad Tobaccowala has had a highly successful career because he has anticipated and capitalized on emerging trends. In *Rethinking Work*, Rishad outlines the reasons why being proactive in this era of unprecedented change is the only way organizations will survive and thrive. Schools, banks, law firms, startups, medical offices—every sector will be affected by the current or soon-to-be emerging trends and events that Rishad describes in this invaluable guide. Learn to thrive in a world where the who, what, why, where, when, and how of work will be transformed. Who will people work for? A growing number of people are choosing to work for themselves, while others are opting for greater control over who they work for. This will lead to more options both for employees and employers on how to structure their work. What will organizations look like? Like nothing in the past. We will no longer have a single organizational model or design but instead have a wide range of operating styles, structures, and sizes. Why will people work? Two thirds of workers under 30 are combining different gigs to not only satisfy their financial needs but to their own personal satisfaction and sense of purpose. Where will people work? In the metaverse. At home. In morphing offices that bear little resemblance to traditional workspaces. With team members in other countries and customers on other continents. When will people work? Whenever. The 9-5 workday is already passing as efficiency lessens in importance to innovation, disruption, and agility. How will leadership change? We are evolving to a new type of leadership from management-focused to growth, agility, and learning-focused.

Digital transformation is reshaping the business arena as new successful digital business models are increasing agility and presenting better ways to handle business than the traditional alternatives. Industry 4.0 affects everything in our daily lives and is blurring the line between the physical, the biological, and the digital. This created an environment where technology and humans are so closely integrated that it is impacting every activity within the organizations. Innovative and Agile Contracting for Digital Transformation and Industry 4.0 analyzes the consequences, benefits, and possible scenarios of contract transformation under the pressure of new technologies and business dynamics in modern times. The chapters cover the problems, issues, complications, strategies, governance, and risks related to the development and enforcement of digital transformation contracting practices.
