CRC World Dictionary of Palms Umberto Quattrocchi, 2017-08-03 From the Foreword Umberto Quattrocchi has brought us some amazing and useful works through the various dictionaries that he has compiled This time it is for two very important plant families the palms and the cycads

that are synthesized here in these two volumes. Each entry is fascinating not just for the botany and full nomenclature of the plant species but for all the associated uses, folklore and interactions with other organisms. These entries are fascinating glimpses of natural history. Botanists, conservationists, ethnobotanists, anthropologists, geographers, bird watchers, naturalists, historians and those of many other disciplines will find these volumes a most valuable and useful resource. It is the sort of book that will be in frequent use in my library. Professor Sir Ghilleen Prance FRS VMH, Former Director, Royal Botanic Gardens Kew. Following the same format as Umberto Quattrocchi's highly praised and well used previous works, *The CRC World Dictionary of Palms*, *Common Names*, *Scientific Names*, *Eponyms*, *Synonyms* and *Etymology*, brings together the vast and scattered literature on palms and cycads to provide better access to information on these economically important plants. Each genus and species has a detailed morphological description and includes a list of synonyms and vernacular names in many languages. Bibliographies accompany each entry which are comprehensive, up to date and multi lingual. The detailed information for every entry on habitats, economic uses, historical and biographical data, botanical exploration and linguistics will be useful for any library involved with botany, herbal medicine, pharmacognosy, medicinal and natural product chemistry, ecology, ethnobotany, systematics, general plant science, agriculture or horticulture. Umberto Quattrocchi is the author of the bestselling *CRC World Dictionary of Plant Names*, winner of the prestigious Hanbury Botanical Garden Award. His most recent multi volume work, *CRC World Dictionary of Medicinal and Poisonous Plants*, received strong praise as being an unparalleled starting place, a tool of first resort for any thoughtful researcher. Quattrocchi and CRC have delivered a dictionary like no other, a learned finger pointing in the right direction. John de la Parra, Northeastern University, Boston, Massachusetts, USA. *Economic Botany*, Vol 68, 2014. *Palms & Cycads*, 1998. **Systematics and Phylogeny of Weevils**. Rolf Oberprieler, Adriana Marvaldi, Chris Lyal, 2019-04-16. This Special Issue on the Systematics and Phylogeny of Weevils presents 31 new research papers on one of the most diverse and successful groups of animals on Earth, the beetle superfamily Curculionoidea. It was in part inspired to commemorate the extraordinary life and scientific achievements of Guillermo Willy Kuschel, 1918-2017, who shaped this field of science over the last century like no other weevil systematist. The papers in this memorial issue span weevil faunas from all over the globe, including South and Central America, Africa, Europe and the Near East, South East Asia, New Guinea, Australia and New Zealand. They include major advances on the phylogeny and classification of the broad-nosed weevils, Entiminae, on the weevils associated with American cycads and on the unique extinct weevil fauna preserved in the 100 million year old Burmese amber when weevils started to diversify alongside the oldest angiosperm plants. They comprise a tribute to Willy Kuschel, the proceedings of a weevil symposium held in his honor in 2016 in Orlando, Florida. 24 systematic studies, including seven phylogenetic analyses and five other contributions on the diversity, biology, distribution, evolution and fossil history of weevils. In the papers collated in this volume, 30 new genera and 92 new species of weevils are described and a new family of extinct weevils is recognized. *Australian Journal of Botany*.
