Cycles And Stagnation In Socialist Economies A Mathematical Analysis:

Cycles and Stagnation in Socialist Economies András Simonovits, 1992 Throughout Central and Eastern Europe the future of the socialist economic system is being called sharply into question This book represents an extension and consolidation of the programme of work begun by Janos Kornai in Growth Shortage and Efficiency and examines the causes of the macroeconomic problems embedded in centrally planned economies which now face their reformers Andras Simonovits asks three key questions Why and how did investment activity fluctuate in the sixties Why did the growth rate decelerate in the seventies What was the reason for the stagnation of the eighties The author constructs a series of analytic mathematical models of cycles and slowdown to explore these questions The first part of the book is devoted to the investment cycles of the East European socialist economies and the negative effect of long completion times and high net import ratios Part II models the slowdown and stagnation of the post 1973 period and in particular changes in the efficiency of investment and the terms of trade The results point to the failure of the socialist economies to adapt quickly enough to falling investment effectiveness and rising debt Andras Simonovits rigorous and wide ranging study is an important contribution to the literature on socialist economies and will do much to inform the debate over their transition

Aggregate Behaviour of Investment in China, 1953-96 Laixiang Sun, 2001-06-26 In China aggregate investment levels have been high and the cycles of investment growth rate have been remarkable In order to reveal the mechanisms which drive investment hunger and cycles this book develops an integrated growth cycle framework which integrates the standard theory of socialist economies the distributive barrier constrained growth theory of developing economies and the recent technical progresses in the western business cycle theory It also analyzes the evolutionary dynamics of China's state investment system and the policy trade off between industrial expansion and agricultural development **International**

Struggle and Hope János Kornai, 1997 This major book presents an objective and penetrating economic analysis of stabilization and reform in Eastern Europe combined with a compassionate plea for individual rights and solidarity Janos Kornai one of the most famous Hungarian economists of his generation focuses on two main issues first

the problems of stabilization and adjustment which are painful but necessary conditions of sustainable growth and second the reform of the premature welfare state of Eastern European countries which is disproportionately large in relation to the resources available and which was hitherto managed in a highly centralized bureaucratic and paternalistic way Struggle and Hope goes beyond most other books on the transition process by placing considerable emphasis on the understanding of the ethical implications and the historical roots of each problem and also the political conditions and consequences of change Although economic efficiency is extremely important it is not the exclusive criterion ethical principles of individual sovereignty and solidarity must also receive particular attention Professor Kornai's insightful analysis will become required reading for all those concerned with the process of post socialist transition
