Cycles Of Child Maltreatment Facts Fallacies And Interventions:

Cycles of Child Maltreatment Ann Buchanan, 1996-11-27 Although most families do not repeat the patterns of abuse of their childhood there is evidence that for whatever reason substantial numbers do This book explores continuing intergenerational cycles of child maltreatment and the controversies that surround the theories focusing mainly on physical abuse neglect and emotional abuse rather than sexual abuse Examining the facts and the fallacies permeating the international literature the author suggests that in intergenerational child maltreatment there may not be just one cycle but four separate cycles sociopolitical factors recurring cultural patterns psychological factors and biological factors Interventions need to be focused on each cycle independently to attempt to break the cycle of child maltreatment Ann Buchanan draws on her wide range of both academic and research experience in this field as well as on her clinical experience to bring together both the theories and research in the mechanisms of transmission and the practical aspects of interventions The book is easily accessible with clear summaries and will prove an excellent introduction to all those working with children and families

Understanding Child Maltreatment Maria Scannapieco, Kelli Connell-Carrick, 2005-02-10 Child maltreatment professionals from all disciplines struggle to find better ways of understanding and treating the families and children affected by maltreatment Since the mid 1960s the battered child syndrome and recent high profile abuse cases a plethora of research and literature on child maltreatment has emerged yet this is the first volume to offer a comprehensive integrated analysis for understanding assessing and treating child maltreatment within the ecological framework in a developmental context This framework systematically organizes and integrates the complex empirical literature in child maltreatment and development including the often overlooked period of adolescence Viewing child maltreatment from an ecological perspective this volume identifies the risk and protective factors correlated with abuse and neglect The authors present a comprehensive assessment framework addressing the multiple developmental and environmental factors unique to each case This framework fully considers risk and protective factors and their relationship to individuals families and environmental elements presenting a much needed perspective for today's child protective services workers Understanding Child Maltreatment is the first of its kind While most books broadly address the developmental consequences of maltreatment this volume goes further by proposing assessment and intervention strategies based on a deep understanding of each stage of a child's development Interventions center on the caregiver and the family with particular attention to parenting skills and the challenges the child may experience within his or her developmental stage Each chapter emphasizes empirically based interventions and includes a case illustration that guides readers in applying these concepts to their own practice Providing a comprehensive nuanced perspective on maltreatment this book will be invaluable to students researchers and professionals

Family Matters Peter Reder, Mike McClure, Anthony Jolley, 2005-08-19 Family Matters focuses on research and clinical material which bridges the traditional gap between child and adult mental health Rather

than considering child and adult problems separately the authors address the often complex interactions between the two covering such topics as The implications of childhood trauma in later life The impact of parental mental health problems on children How interactions within a family can affect the mental health of all individuals within the family The authors review existing research and cover their own recent studies and practical experience and put forward new theoretical models to underpin their recommendations for changes in practice such as liaison initiatives between child and adult services and specialised services to treat adolescents parenting breakdown and perinatal psychiatric illness The findings and recommendations in Family Matters have important implications for the organisation and funding of mental health and related services and staff training and should be read by all those in professions concerned with child and adult mental health including psychiatrists family therapists psychotherapists nurses health visitors and social workers and health service managers
