D H Lawrence Science And The Posthuman:

D.H. Lawrence, Science and the Posthuman J. Wallace, 2005-06-28 Why was D H Lawrence preoccupied with the enigma of the human as thinking matter This first sustained study of Lawrence and science shows how posthuman conceptions of a material kinship between humans animals and machines can transform our understanding of Lawrence's work and of its complex relationship with scientific epistemologies Through detailed readings of evolutionary philosophy and of the new Bergsonism of Deleuze and others Wallace provides a radical reappraisal of Lawrence in terms of an antihumanist or posthumanist humanism Hardt and Negri Literature and Science Martin Willis, 2014-12-01 This Guide introduces literature and science as a vibrant field of critical study that is increasingly influencing both university curricula and future areas of investigation Martin Willis explores the development of the genre and its surrounding criticism from the early modern period to the present day focusing on key texts topics and debates *The Intelligent Unconscious in Modernist Literature and Science* Thalia Trigoni, 2020-11-16 This book reassesses the philosophical psychological and above all the literary representations of the unconscious in the early twentieth century This period is distinctive in the history of responses to the unconscious because it gave rise to a line of thought according to which the unconscious is an intelligent agent able to perform judgements and formulate its own thoughts The roots of this theory stretch back to nineteenth century British physiologists Despite the production of a number of studies on modernist theories of the relation of the unconscious to conscious cognition the degree to which the notion of the intelligent unconscious influenced modernist thinkers and writers remains understudied This study seeks to look back at modernism from beyond the Freudian model It is striking that although we tend not to explore the importance of this way of thinking about the unconscious and its relationship to consciousness during this period modernist writers adopted it widely The intelligent unconscious was particularly appealing to literary authors as it is intertwined with creativity and artistic novelty through its ability to move beyond discursive logic The book concentrates primarily on the works of D H Lawrence Virginia Woolf and T S Eliot authors who engaged the notion of the intelligent unconscious reworked it and offered it for the consumption of the general populace in varied ways and for different purposes whether aesthetic philosophical societal or ideological Shortlisted for the Modernist Studies Association MSA First Book Prize and for the 2021 British Society for Literature and Science Book Prize *Machinic Modernism* Beatrice Monaco, 2008-10-23 How can the concepts of Deleuze and Guattari be used to unearth the metaphysics of modernist literature This intersection of philosophy and key literary works uses their radical concepts to draw a dynamic map of modernism that explores the confrontation of each writer with the non human machine age of the early twentieth century

Ferreira,2005-02-28 The idea of human cloning has fascinated writers and philosophers for centuries and has been dramatized in myths and fiction This volume traces these fictional illustrations of human cloning from some of the earlier manifestations to more contemporary responses Using a feminist and psychoanalytic perspective this book examines parthenogenesis and other related fantasies and argues that cloning could be an important tool in helping women achieve a more egalitarian status Ferreira contemplates the new psychological implication for humanity that will arise as a result of the development and application of genetic engineering and the possible implementation of human cloning This is one of the first books wholly devoted to a specifically literary analysis of the many issues surrounding the fantasy of human cloning which could in fact become a reality at any moment It makes it a timely contribution to the controversial political social ethical cultural and philosophical debate on cloning and its numerous ramifications Новая литература по социальным и гуманитарным наукам ,2008 Clio ,2002 The Writers Directory ,2013 **Sex and the Posthuman Condition** M.
