**Doing Conversation Analysis** Paul ten Have, 2007-10-15 This Second Edition of Paul ten Have's now classic text on Doing Conversation Analysis has been substantially revised to bring the book up to date with the many changes that have occurred in Conversation Analysis over recent years. The book has a dual purpose to introduce the reader to Conversation Analysis CA as a specific research approach in the human sciences and to provide students and novice researchers with methodological and practical suggestions for actually doing CA research.

**Doing Conversation Analysis** Paul ten Have, 1999-02-23 Doing Conversational Analysis provides hands on experience in training to become a conversation analyst. The author places a strong and consistent focus on the theoretical, methodological and practical aspects of the subject.

**Doing Conversation, Discourse and Document Analysis** Tim Rapley, 2018-09-03 Introducing the theory and practice of conversation, discourse and document analysis, this book proves how useful these methods are in addressing key questions in the social sciences. **Doing Psychological Research, 2e** Nicky Hayes, 2021-02-16 This book is an excellent grounding in both quantitative and qualitative psychological research methods which provides an excellent one stop shop for any student beginning their learning journey. Mark Griffiths, Distinguished Professor of Behavioural Addiction, Nottingham Trent University. This new edition will be warmly welcomed by anxious psychology students. Susanna Kola Palmer, Senior Lecturer in Psychology, University of Huddersfield. Authoritative and yet written with the clarity and liveliness that are Hayes' hallmark, she employs great depth of knowledge and wide experience both harnessed to make this potentially dry and daunting subject accessible and even fun to read about. Peter Stratton, Emeritus Professor, University of Leeds, UK. A must have for any student undertaking psychological research, this new edition has been comprehensively updated while maintaining the simple, friendly language and use of everyday examples that have already helped generations of students to successfully understand what research methods are and how one might actually go about using them. The book is divided into data gathering and analytical sections and covers the main methods used in psychology for each of these purposes. With detailed explanations of underlying principles as well as exercises, activities, worked examples of statistical tests and self assessment questions, Hayes shows you what you are doing, when you should do it and why you are doing it. New to this edition: Discussion on ethics at the end of each chapter on data gathering; Assessment of netnography and online research; Additional examination of legal developments such as GDPR; New chapter on multivariate analysis. An accessible and thorough introductory text for all students of research methods in psychology. Nicky Hayes is a Fellow of the British Psychological Society, a Chartered Psychologist and an Honorary Life Member of the Association for the Teaching of Psychology. She has written widely and is particularly respected for her ability to apply psychology to everyday life, working
