Sensory Abilities of Cetaceans Jeanette A. Thomas,Ronald A. Kastelein,2013-11-11 This book evolved through the efforts of several organizations and the dedication of many individuals In 1987 we received arequest to propose a workshop topic for the Fifth International Theriological Congress ITC to be held in August 1989 in Rome Italy After looking up the meaning of the word theriological in the dictionary and discovering that it pertains to mammalian behavior we decided a symposium on sensory abilities of whales and dOlphins would be an interesting topic The ITC convenes only every five years and has the distinction of being very well attended by scientists from around the world We thought that hosting a workshop in conjunction with the ITC would attract a variety of international scientists that rarely have the opportunity to interact Fortunately for all involved our prediction was correct The first two days of the workshop 23 24 August 1989 were held in conjunction with ITC and the nearly 1 000 attending scientists were able to view our posters and listen to lectures The third day was limited to only ab out 65 invited scientists who were divided into topical working groups chaired by a rapporteur
