The Experience of Researchers from the Visegrád Group** Bogusława Drelich-Skulska,Magdalena Sobocińska,Andrea Tomášková,2025-02-03 The monograph entitled The Importance of Universities for Society and Economy The Experience of Researchers from the

Visegrád Group was made by 28 authors representing 12 universities from the Visegrád Group. The intention of the authors is to answer the question about the role of universities and the relevance of research they conduct for the construction of sustainable societies and modern economies in conditions of volatile environments. Addressing the problems discussed in this monograph from the perspective of the experience of researchers from Poland, Czechia, Slovakia, and Hungary corresponds with the important direction in the development of science, namely its internationalisation. The monograph consists of three parts. The first concerns the functioning of universities and directions in the development of education as well as the scientific research conducted in the context of the sustainability crisis and the need to expand the scope of implementation of the sustainable development concept. The considerations included in the second part of the monograph regard academic teaching and areas of research emerging in the context of the ongoing technological progress, particularly visible in the growing use of artificial intelligence and the need to develop digital competencies. The third part presents the results of research undertaken in view of finding research gaps resulting from changes in the geopolitical and social conditions produced by the COVID-19 pandemic.

Sustainable Products in the Circular Economy Magdalena Wojnarowska, Marek Ćwiklicki, Carlo Ingraio, 2022-04-24. This book explores how the circular economy influences product design in today's business and society. Drawing on contributions from a wide range of expert thinkers, this volume assesses the existing approaches, strategies, and tools which facilitate socially and environmentally responsible production and consumption systems. It then goes on to highlight the ways in which the circular economy conceptual framework could be implemented effectively at both micro-product policy and macro-sustainable consumption levels in order to alter the industrial landscape and increase its interconnectedness with materials and scarce resources. Highlighting the pros and cons of transitioning to this new model, the book also cautions that it will only be made possible via significant behavior change at both industry and consumer levels. *Sustainable Products in the Circular Economy* will be of great interest to students and scholars of sustainable manufacturing, sustainable consumption, corporate social responsibility, and business ethics. It will also be relevant to industry professionals whose work dovetails with these areas.

Models of Intellectual Property Governance and Administration. World Intellectual Property Organization, 2024-07-15. *Models of Intellectual Property Governance and Administration* documents and analyzes prevailing approaches, trends, and emerging directions in IP governance and administration. This study will equip policymakers with valuable insights to support well-informed decisions in designing IP governance and administration frameworks, thereby unleashing the full potential of the intellectual property system for the benefit of society.
