Artificial Intelligence Applications and Innovations Ilias Maglogiannis, Lazaros Iliadis, Elias Pimenidis, 2020-05-29 This 2 volume set of IFIP AICT 583 and 584 constitutes the refereed proceedings of the 16th IFIP WG 12.5 International Conference on Artificial Intelligence Applications and Innovations AIAI 2020 held in Neos Marmaras Greece in June 2020. The 70 full papers and 5 short papers presented were carefully reviewed and selected from 149 submissions. They cover a broad range of topics related to technical, legal and ethical aspects of artificial intelligence systems and their applications and are organized in the following sections: Part I: classification, clustering, unsupervised learning, analytics, image processing, learning algorithms, neural network modeling, object tracking, object detection systems, ontologies, AI and sentiment analysis, recommender systems; Part II: AI ethics, law, AI constraints, deep learning, LSTM, fuzzy algebra, fuzzy systems, machine learning, medical health systems and natural language. The conference was held virtually due to the COVID-19 pandemic. **The Routledge Handbook of Artificial Intelligence and Philanthropy** Giuseppe Ugazio, Milos Maricic, 2024-11-07 The Routledge Handbook of Artificial Intelligence and Philanthropy acts as a catalyst for the dialogue between two ecosystems with much to gain from collaboration: artificial intelligence (AI) and philanthropy. Bringing together leading academics, AI specialists and philanthropy professionals, it offers a robust academic foundation for studying both how AI can be used and implemented within philanthropy and how philanthropy can guide the future development of AI in a responsible way. The contributors to this Handbook explore various facets of the AI philanthropy dynamic, critically assess hurdles to increased AI adoption and integration in philanthropy, map the application of AI within the philanthropic sector, evaluate how philanthropy can and should promote an AI that is ethical, inclusive and responsible, and identify the landscape of risk strategies for their limitations and/or potential mitigation. These theoretical perspectives are complemented by several case studies that offer a pragmatic perspective on diverse successful and effective AI philanthropy synergies. As a result, this Handbook stands as a valuable academic reference capable of enriching the interactions of AI and philanthropy, uniting the perspectives of scholars and practitioners, thus building bridges between research and implementation and setting the foundations for future research endeavors on this topic.
