 its benefits and potential pitfalls the variety of programs that can be chosen such as flextime flexiplace and remote work

 ,1980 *New Directions in MIS Management* Robert J. Thierauf,1988-11-15 Thierauf s work develops a number of
 interesting and potentially useful approaches to management information systems MIS practice The author presents a
 number of techniques some well known others more recent that practicing MIS managers may adopt to facilitate effective
 MIS planning for the 1990 s by focusing on problem finding rather than on problem solving A primary recommendation of
 Thierauf s is the restructuring of the MIS organization using a functional end user departmental approach Discussed at
 length are various issues relevant to this restructuring such as staffing motivating MIS personnel and end users and MIS soft
 controls Recommended for upper level undergraduate and graduate students as well as practicing managers and MIS
 specialists Choice With new developments in hardware and software MIS managers are increasingly faced with the need to
 develop more sophisticated managerial as opposed to purely technical skills Here an acknowledged expert in the field of
 information systems draws on his own original research and experience to develop a set of workable strategies and
 techniques that MIS managers can use to function more effectively as we move into the next decade Thierauf identifies
 probable trends in the field in coming years and outlines ways in which MIS managers can anticipate predictable problems
 apply improved management skills to the end user interface and effectively motivate MIS personnel Thierauf concentrates
 particularly on four major areas of managerial responsibility planning organizing motivating and controlling In planning he
 shows how to use problem finding techniques to anticipate and solve potential problems between MIS personnel and end
 users To help reduce this conflict Thierauf argues there is a need for a new direction in organizing MIS departments He
 proposes bringing MIS and end use departments together by using a functional departmental approach In motivating MIS
 personnel there is need to go beyond self actualization by emphasizing mutual actualization as well as self donation Finally in
 the area of control Thierauf advocates the use of soft controls to replace stringent controls that have had a tendency to
 restrict personal freedom on the job A common thread throughout the discussion is a focus on effective guidelines for the MIS
 manager to follow in order to come to grips with the changing realities of the 1990s **Calculator Users Guide and**
