Challenge And Response Justification In Ethics:

Challenge and Response Carl Wellman,1971 Mr Wellman s highly original contribution to the relatively new field of justification in ethics consists of characterizing the different ways in which ethical statements can be challenged and showing how each sort of challenge can be met by an appropriate response enabling reasonable men to appropriately discuss or reflect on ethical issues In developing his unique systematic methodology of ethics Mr Wellman has first rigorously reviewed and refuted the main arguments for the view of the nature of all reasoning as deductive and second convincingly presented arguments for the existence of nondeductive evidences in ethics Mr Wellman s broad definition of reasoning and his rejection of the identification of justification with reasoning reveals new dimensions of justification which will have wide implications in other areas of human speculation

Ethical Argumentation Douglas Walton, 2009-01-01 Bridging the gap between applied ethics and ethical theory Ethical Argumentation draws on recent research in argumentation theory to develop a more realistic model of how ethical justification actually works Douglas Walton presents a new model of ethical argumentation in which ethical justification is analyzed as a defeasible form of argumentation considered in a balanced dialogue Walton s new model employs techniques such as asking the appropriate critical questions probing accepted values finding nonexplicit

assumptions in an ethical argument and deconstructing emotive terms and persuasive definitions This book will be of significant interest to scholars and advanced students in applied ethics and theory *Dissent and Affirmation* Arthur L. Kalleberg, J. Donald Moon, Daniel R. Klemke, 2000 English philosopher George Edward Moore 1873 1958 developed the chief modern theory of ethics Ideal Utilitarianism A Defense of Realism examines Moore's conception of philosophy and his views on the importance of metaphysics presenting and evaluating the Principia Ethica author's criticisms and refutations of certain philosophical positions especially idealism naive realism phenomenalism and pragmatism Klemke gives a detailed analysis and an appraisal of Moore's defense of common sense and concentrates on Moore's realism beginning with the reality of entities in the natural universe and proofs of the external world Finally Klemke analyzes and enhances through personal argument Moore's views on the reality of various nonnatural entities crucial to Moore's defense of philosophical realism **The Theory of Knowledge** Louis P. Pojman, 1999 This is a comprehensive reader in epistemological theory It contains 68 readings and the book is organized into 11 parts which outline the subjects central to contemporary epistemology Opposing positions are set forth for all issues and a brief synopsis introduces each reading The Philosophical Review Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1974 An international journal of general philosophy *The Ethical Challenges of Academic Administration* Elaine E. Englehardt, Michael S. Pritchard, Kerry D. Romesburg, Brian Schrag, 2009-09-18 This book is an invitation to academic administrators at every level to engage in reflection on the ethical dimensions of their working lives Academics are very good at reflecting on the ethical issues in other professions but not so interested in reflecting on those in their own including those faced by faculty and administrators Yet it is a topic of great importance Academic institutions are value driven hence virtually every decision made by an academic administrator has an ethical component with implications for students faculty the institution and the broader community Despite this they receive little systematic preparation for this aspect of their professional lives when they take up administrative posts especially when compared to say medical or legal training Surprisingly little has been written about the ethical challenges that academic administrators are likely to face Most of the literature relating to academic administration focuses on leadership and draws heavily on management and social science theory The importance of focusing on ethical deliberation and decision making often goes unrecognized *Selected Issues in Logic and Communication* Trudy Govier, 1988 *Selected Issues in Logic and Communication* is the first anthology to explore the many points of intersection between the realms of critical thinking and

modern mass communication It raises important questions about how the mass media influence thought and considers whether a free marketplace of ideas is still a viable concept today
