Challenge To The New Deal:

Challenge to the New Deal Alfred Mitchell Bingham, Selden Rodman, 1934 The articles and drawings all appeared in the pages of Common sense Introduction **Proceedings of the Biennial Conference** National Association for the Education of Young Children, 1927 **Your Library**, 1927 *Report of the ... Conference of Those Interested in Nursery Schools*, 1927 Constitutional Process Maxwell L. Stearns, 2002 This is the first comprehensive analysis of how the collective nature of Supreme Court decision making affects the transformation of the justices preferences into constitutional doctrine Analyzing the Supreme Court from the perspective of social choice theory Maxwell L Stearns offers new insights into Supreme Court decision making that have profound implications for understanding the outcomes in a number of cases and the resulting doctrinal development within constitutional law which traditional analyses have proven ill equipped to explain The book models several important process based Supreme Court rules including outcome voting the narrowest grounds rule stare decisis and justiciability with a particular emphasis on standing These doctrines have each had a significant impact upon the evolution of modern constitutional law including but not limited to the following areas affirmative action school desegregation racial gerrymandering obscenity and abortion Each model is presented in nontechnical language with several concrete illustrations drawn from recent Supreme Court case law The book offers a new understanding of two apparently paradoxical situations first cases in which there are separate majorities on specific issues in the case that suggest logically that there should be a majority for the dissenting result and second cases in which discrete minorities as opposed to the apparent majority control the identification and resolution of dispositive case issues In addition the book sheds new light on why the Court employs stare decisis even though the doctrine grounds the evolution of legal doctrine on the order in which cases are presented and decided and on how the modern standing doctrine ameliorates the incentives for interest groups to time the litigation of cases in a way that will exert a disproportionate influence over the direction of constitutional doctrine This book will appeal to scholars of the Supreme Court or judicial decision making It should also be of interest to students of social choice and of law and economics who have not previously considered the Supreme Court or constitutional law as fertile ground for their disciplines Maxwell L Stearns is Professor of Law George Mason University School of Law **The Republican Party in the Age of Roosevelt** Elliot A. Rosen, 2014-02-21 Elliot Rosen s Hoover Roosevelt and the Brains Trust focused on the transition from the Hoover administration to that of Roosevelt and the formulation of the early New Deal program Roosevelt the Great Depression and the Economics of Recovery emphasized long term and structural recovery programs as well as the 1937-38 recession Rosen s final book in the trilogy *The Republican Party in the Age of Roosevelt* situates distrust of the federal government and the consequent transformation of the party Domestic and foreign policies introduced by the Roosevelt administration created division between the parties The Hoover doctrine which sought to restrict the reach of independent agencies at the federal level in order to restore business confidence and investment intended to

reverse the New Deal and to curb the growth of federal functions In his new book Elliot Rosen holds that economic thought regarding appropriate functions of the federal government has not changed since the Great Depression The political debate is still being waged between advocates for direct intervention at the federal level and those for the Hoover ethic with its stress on individual responsibility The question remains whether preservation of an unfettered marketplace and our liberties remain inseparable or whether enlarged governmental functions are required in an increasingly complex national and global environment By offering a well researched account of the antistatist and nationalist origins not only of the debate over legitimate federal functions but also of the modern Republican Party this book affords insight into such contemporary political movements as the Tea Party *The Journal of Health and Physical Education* ,1934 The Hughes Court Mark V. Tushnet,2021 This book describes the closing of one era in constitutional jurisprudence and the opening of another This study of the Supreme Court from 1930 to 1941 when Charles Evans Hughes was Chief Justice shows how nearly all justices even the most conservative accepted the broad premises of a progressive theory of government and the Constitution The progressive view gradually increased its hold throughout the decade but at its end interest group pluralism began to influence the law By 1941 constitutional and public law was discernibly different from what it had been in 1930 but there was no sharp or instantaneous Constitutional Revolution in 1937 despite claims to the contrary This study supports its conclusions by examining the Court s work in constitutional law administrative law the law of justiciability civil rights and civil liberties and statutory interpretation *The Liberal Consensus Reconsidered* Robert Mason,Iwan Morgan,2019-10-14 Here leading scholars including Hodgson himself confront the longstanding theory that a liberal consensus shaped the United States after World War II The essays draw on fresh research to examine how the consensus related to key policy areas how it was viewed by different factions and groups what its limitations were and why it fell apart in the late 1960s **Dress & Vanity Fair** ,1935 **Unjust Restitution** Michael Kingsley Brown,2025-02-04 The question of economic justice for Black Americans remains unresolved and continues to be the subject of contentious political debate In *Unjust Restitution* Michael K Brown examines the meaning of racial equality during three transformative periods in American history when significant changes to economic status and opportunity appeared to be a real possibility in the US Reconstruction the New Deal and the Great Society Political leaders believed slavery and Jim Crow degraded Black people and enacted policies to rehabilitate formerly subjugated individuals Black Americans challenged this conception and repudiated the idea that they were damaged people in need of repair Repeatedly Black people s vision of economic justice was based on anti privilege egalitarianism the idea that a just restitution for their oppression required abolishing the political and legal privileges whites had acquired Black opposition reveals what was at stake at each historical moment and what might constitute economic justice in the twenty first century Equality of opportunity can be a just restitution for continuing durable racial inequality only if it changes the structure of people s economic opportunities The Presidency and the Political System Michael Nelson,2020-07-17 The
