Challenges to Graduate Schools Ann M. Heiss, University of California, Berkeley. Center for Research and Development in Higher Education, 1970

Challenges in Chemistry Graduate Education National Research Council, Division on Earth and Life Studies, Board on Chemical Sciences and Technology, Committee on Challenges in Chemistry Graduate Education; Board on Chemical Sciences, 2012-09-21

Chemistry graduate education is under considerable pressure. Pharmaceutical companies long a major employer of synthetic organic chemists are drastically paring back their research divisions to reduce costs. Chemical companies are opening new research and development facilities in Asia rather than in the United States to take advantage of growing markets and trained workforces there. Universities especially public universities are under significant fiscal constraints that threaten their ability to hire new faculty members. Future federal funding of chemical research may be limited as the federal budget tightens. All of these trends have major consequences for the education of chemistry graduate students in U S universities. To explore and respond to these intensifying pressures the Board on Chemical Sciences and Technology held a workshop in Washington DC on January 23-24, 2012 titled Graduate Education in Chemistry in the Context of a Changing Environment. The workshop brought together representatives from across the chemical enterprise representing leaders and future leaders of academia, industry and government. The goal of the workshop was not to come to conclusions but to have an open and frank discussion about critical issues affecting chemistry graduate education such as the attraction and retainment of the most able students to graduate education, financial stressors on the current support model and their implications for the future, model competencies needed in the changing job market for Ph D chemists and competencies needed to address societal problems such as energy and sustainability.

Challenges in Chemistry Graduate Education: A Workshop Summary is organized into six chapters and summarizes the workshop on Graduate Education in Chemistry in the Context of a Changing Environment.

The Social History of the American Family Marilyn J. Coleman, Lawrence H. Ganong, 2014-09-02

The American family has come a long way from the days of the idealized family portrayed in iconic television shows of the 1950s and 1960s. The four volumes of *The Social History of the American Family* explore the vital role of the family as the fundamental social unit across the span of American history. Experiences of family life shape so much of an individual's development and identity yet the patterns of family structure, family life and family transition vary across time, space and socioeconomic contexts. Both the definition of who or what counts as family and representations of the ideal family have changed over time to reflect changing mores, changing living standards and lifestyles and increased levels of social heterogeneity. Available in both digital and print formats, this carefully balanced academic work chronicles the social, cultural, economic and political aspects of American families from the colonial period to the present. Key themes include families and culture, including mass media families and religion, families and the economy, families and social
