Boyd, Mary Ann Walter, 2014-03-17 Cultural Difference and Social Solidarity Solidarities and Social Function explores solidarity as a social function bringing to the fore the critical value of the concept of solidarity in understanding contemporary societies The first part of the book Solidarities provides different theoretical approaches to the conception and exploration of solidarity that depart from the traditional and dominant perspectives within which debates about solidarity take place This part includes chapters on the origins of the concept of solidarity in French social thought in the nineteenth century a critical discussion of the later Foucault's augmentation of his concerns with a critical politics of difference with a politics of parrhesia Theodor Adorno and the identitarian logic that underpins reconciliation between difference and solidarity in initiatives such as multiculturalism Alisdair MacIntyre and his rearticulation of Aristotelian virtue ethics to explore the value of solidarity ingrained in the practice of politics as a means of developing solidarity and a transitional chapter that explores the social function of postcolonial theory The second part of the book Social Function seeks to explore particular cases in which solidarity is constituted The cases are diverse in global location level of association focus on cultural political and policy contexts and different approaches to analysis As such they provide a set of cases from which different aspects of the problems of making and remaking solidarity can be explored These chapters include a case study in Israel exploring solidarity and social cohesion through migration globalisation and modernising processes a case study of the African Village Market in Sydney Australia an example of the complexities of solidarity and identity in the Slovene context and an exploration of how state action in Turkey dissolves solidarity in a community through urban housing policies

**Critical Studies in Diversity Management Literature** George Gotsis, Zoe Kortezi, 2014-10-08 This book critically examines current workplace diversity management practices and explores a nuanced framework for undertaking supporting and implementing policies that equally favor all people It presents critical perspectives that not only elevate respect for differences but also provide insights into the

nature and dynamics of differences in view of an inclusive and truly participative organizational environment The book first presents a brief overview of the connotations associated with workplace diversity and its effective management Next it focuses on the organizational appropriation of differences through the formation and mediation of various diversity discourses It demonstrates the particular articulations of these discourses with inequality and oppressive structures that perpetuate structural disadvantage due to existing power disparity between dominant and unprivileged group members The book then goes on to underscore the need of constructing relational and context sensitive diversity management frameworks Overall the book outlines that current business cases for diversity focus solely on instrumental goals and tangible outcomes and as a result fail to fully capture the complexity as well as the particularity of the diversity phenomenon The book underlines the necessity for a more inclusive paradigm implying a progressive problem shift in the dominant diversity research agenda from a market driven business oriented diversity management to one highly valuing affirming and respecting otherness

The Politics of Diversity in Europe Gavan Titley, Alana Lentin, 2008-01-01 Diversity has become a key term in contemporary social politics and is often used as both a description of complex social realities and a normative prescription for how those realities should be valued influenced by the politics of multiculturalism and by social movements asserting the right to be different diversity has emerged as an open fluid discourse that challenges reductive visions of legitimate identities and human possibilities It is this apparent acceptance of diversity as a fact and value that this book looks at in several ways it offers a countervailing assessment of diversity seeing it less as a unifying social imaginary and more as a cost free form of politics attuned to the needs of late capitalist consumer societies The essays collected here are developed from a research seminar entitled Diversity Human Rights and Participation organised by the Partnership on Youth between the Council of Europe and the European Commission The studies gathered here are embedded in 10 different national contexts They track dimensions of diversity in education social services jurisprudence parliamentary proceedings and employment initiatives and assess their significances for the social actors who must negotiate these frameworks in their daily experience
