Challenging Images Housing Estates Stigma And Regeneration:

Challenging Images, 2000 **Challenging Images** Jo Dean, Annette Hastings, 2000 Is area and community regeneration enough to challenge the negative perceptions of a stigmatised housing estate The authors of this report argue that unless a housing estate's image problems are effectively challenged alongside regeneration stigma will remain This report is the first to look for solutions to estates image problems as a means of ensuring that the improvements made by regeneration processes are concrete and long lasting *Challenging images* examines three housing estates which have long established problem reputations but which have experienced substantial regeneration The report provides detailed evidence of the perceptions of estate residents residents of neighbouring areas and local stakeholders such as regeneration partners employers journalists and estate agents It discusses the impact of stigma on life chances identifies key actors responsible for building negative estate images suggests key actors for positively managing images provides good practice suggestions for image management looks at implications for policy and practice argues that image management should be a central component of regeneration packages *Challenging images* will be of key interest to those involved in regeneration partnerships managers of housing in low demand and students and researchers of urban and housing policy Research Handbook on Housing, the Home and Society Keith Jacobs, Kathleen Flanagan, Jacqueline De Vries, Emma MacDonald, 2024-08-06 This dynamic Research Handbook explores key perspectives topics and methodologies used to understand housing the home and society Pairing social theory with a broad range of case studies from the Global North and South it offers a unique insight into the field **Housing Policy In The United States** Paul Balchin, Maureen Rhoden, 2020-10-28 Housing Policy in the United States is an essential guidebook to and textbook for housing policy it is written for students practitioners government officials real estate developers and policy analysts It discusses the most important issues in the field introduces key concepts and institutions and examines the most important programs Written as an introductory text it explains all concepts trends and programs without jargon and includes empirical data concerning program evaluations government documents and studies carried out by the author and other scholars The first chapters present the context surrounding US housing policy including basic trends and problems the housing finance system and the role of the federal tax system in subsidizing homeowner and rental housing The middle chapters focus on individual subsidy programs The closing chapters discuss issues and programs that do not necessarily involve subsidies including homeownership mixed income housing and governmental efforts to improve access to housing by reducing discriminatory barriers in the housing and mortgage markets The concluding chapter also offers reflections on future directions of US housing policy *Housing Policy In The United States* Jean Conway, 2003-08-27 Housing Policy An Introduction has been completely revised for its fourth edition Describing and explaining policies as well as analysing recent changes this book provides an accessible introduction to housing policy Housing Policy Paul Balchin, Maureen Rhoden, 2019-01-09 Now in

its fourth edition this textbook has been completely revised to examine the current state of housing policy in the UK Exploring developments in housing policy made since Labour's 1997 electoral victory the book addresses current issues including the brownfield versus greenfield debate the phasing out of renovation grants the transfer of local authority housing to registered social landlords boom slump and boom in the owner occupied sector Other topics addressed range from regional policy and housing across the UK to social exclusion community care and homelessness **London's Aylesbury Estate** Michael Romy, 2020-09-18 This book looks beyond the Aylesbury's public face by examining its rise and fall from the perspective of those who knew it based largely on the oral testimony and memoir of residents and former residents youth and community workers borough Councillors officials police officers and architects What emerges is not a simple story of definitive failures but one of texture and complexity struggle and accord family and friends and of rapidly changing circumstances The study spans the years 1967 to 2010 from the estate's ambitious inception until the first of its blocks were pulled down It is a period rarely dealt with by historians of council housing who have typically confined themselves to the years before or after the 1979 watershed As such it demonstrates how shifts in housing policy and broader political economic and social developments came to bear on a working class community for good and more especially for ill Planning in the UK Andy Thornley, 2018-10-24 This title was first published in 2003 The advent of the Labour government in 1997 provoked major change in the political landscape of the UK Priorities changed and different themes moved to the top of the agenda such as local democracy community transparency sustainability and co-ordinated or joined up thinking Many of the new priorities such as community empowerment involved a reappraisal of the purpose and procedures of planning while others changed the legislative and institutional frame within which planning operated This indispensable volume traces and analyzes the implications for planning created by this political shift Presenting an overview of the general debates on contemporary UK planning the book proceeds to identify four major areas as key themes for planning in the third millennium These are the new institutional context ensuring social inclusion and participation promoting sustainability and the debate over building at higher densities on Brownfield sites Illustrated with in depth case studies the book provides a timely and important examination of the current state of planning in the UK and suggests best case scenarios for the future

Housing, 2001 Sustainable Development and Planning II A. G. Kungolos, C. A. Brebbia, E. I. Beriatos, 2005

Multidisciplinary Handbook of Social Exclusion Research Dominic Abrams, Julie Christian, David Gordon, 2007 Social exclusion is a key problem for policy makers researchers and professionals worldwide Despite this the debate lacks a dominant disciplinary focus This innovative handbook covers evidence from key research and policy to offer cross disciplinary perspectives on major areas of social exclusion Focusing on central policy domains including education healthcare and crime it is structured so as to relate evidence to the state of social exclusion and the mechanisms by which it can be tackled It book will be an unrivalled reference for academics and practitioners working across disciplines including

housing education psychology political science healthcare sociology and law *Devolution* Catherine Bromley,2003 One of the core aims of the Scottish Parliament was that it would provide Scottish Answers to Scottish Questions This book asks how far that aim has been fulfilled *Antipode* ,2003 **High-rise Housing in Europe** Richard Turkington,2004 Whilst every country has its own house building traditions there is only one truly European housing type In the generation after the Second World War countries throughout Europe built high rise housing in the public sector as the modern response to acute housing shortage North and south east and west similar dreams were shared in different political cultures high rise was as an expression of the new Europe A generation later products which shared similar starting points have reached very different positions This book attempts to tell the story of high rise housing in 15 European countries from first thoughts to current realities and finally to future prospects *Population Turnover and Area Deprivation* Nick J. Bailey,Mark Livingston,2007 This report provides the first analysis of neighbourhood migration flows for the whole of England and Scotland based primarily on data from the Census 2001 The Meaning of Housing David Clapham,2005 This book offers a fresh new approach to the study of housing It explores the meaning that housing has for individuals and households by examining housing pathways Housing pathways refer to the varying household forms that individuals experience and the housing routes that they take over time The book argues that housing has increasingly become a means to an end rather than an end in itself The end is personal fulfilment and the main task of housing research is to elucidate the links In this pursuit the concepts of identity and lifestyle are key Specifically the book examines the structure and functioning of households and links this to changing discourses of the family explores the important interconnections between housing and employment considers the relationship between people and the physical aspects of a house and its location looks at housing in terms of lifestyle choice from youth to old age and discusses the implications of the pathways approach for housing policy and future research in the field The meaning of housing is recommended to anyone researching and studying housing and particularly to those wishing to engage with the new research agenda set out here **Atlantis** ,2007 **Environment & Planning** ,2012 *British National Bibliography for Report Literature* , **Planning** ,2000
