### MANAGING ACCOUNTING IN A CHANGING ENVIRONMENT

#### I. *Questions*

1. The American Heritage Dictionary defines quality as "1. a characteristic or attribute of something; property; a feature. 2. the natural or essential character of something. 3. excellence; superiority."

Quality for a product or service can be defined as a "product or service that conforms with a design which meets or exceeds the expectations of customers at a price they are willing to pay."

2. Procter & Gamble defines TQM as "the unyielding and continually improving effort by everyone in an organization to understand, meet, and exceed the expectations of customers." Typical characteristics of TQM include focusing on satisfying customers, striving for continuous improvement, and involving the entire workforce.

TQM is a continual effort and never completes. Global competition, new technology, and ever-changing customer expectations make TQM a continual effort for a successful firm.

3. The core principles of TQM include (1) focusing on satisfying the customer, (2) striving for continuous improvement, and (3) involving the entire work force.
4. Continuous improvement (Kaizen) in total quality management is the belief that quality is not a destination; rather, it is a way of life and firms need to continuously strive for better products with lower costs.

In today's global competition, where firms are forever trying to outperform the competition and customers present ever-changing expectations, a firm can never reach the ideal quality standard and needs to continuously improve quality and reduce costs to remain competitive.

5. The Institute of Management Accountants (IMA) believes an effective implementation of total quality management will take between three and five years and involves the following tasks:

#### Year 1

- Create a quality council and staff
