Change Hope The Bomb:

Change, Hope and the Bomb David Eli Lilienthal, 2015-12-08 For thirteen years since his resignation from the chairmanship of the Atomic Energy Commission Mr Lilienthal has kept silent on the atom turning his energies and talents to the field of international development Now the first chairman of the AEC speaks out on the vital question of disarmament on the role of the atom in modern life and on the AEC itself His views are controversial and will not be popular in many quarters Mr Lilienthal thinks that the present disarmament negotiations are premature and dangerous that our view of the place of the atom in the modern world has been mainly wrong and that the functions of the AEC should be largely absorbed into other government and private activities Originally published in 1963 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 Bulletin of the Atomic Scientists ,1963-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Bulletin of the Atomic Scientists** ,1963-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Savannah River Site at Fifty** Mary Beth Reed,2002 The heart of the book is a historical treatment of Savannah River Site s operations its peak period of production 1953 to 1979 Developments in reactor technology and chemical separations heavy water production waste management and the research goals of the Savannah River Laboratory are described in layman s terms and are amply illustrated This history profiles the individuals who brought the plant to maturity and explores the two themes that define the nuclear weapons workplace safety and security **Nuclear Reactions** James W. Feldman,2016-11-01 Nuclear Reactions explores the nuclear consensus that emerged in post World War II America characterized by widespread support for a diplomatic and military strategy based on nuclear weapons and a vision of economic growth that welcomed nuclear energy both for the generation of electricity and for other peaceful and industrial uses Unease about the environmental consequences of nuclear energy and weapons development became apparent by the early 1960s and led to the first challenges to that consensus The documents in this collection address issues such as the arms race mutually assured destruction the emergence of ecosystems ecology and the environmental movement nuclear protests and climate change They raise questions about how nuclear energy shaped and continues to shape the contours of postwar American life These questions provide a useful lens through which to understand the social economic and environmental tradeoffs embedded
