Changing Character Short Term Anxiety Regulating Psychotherapy For Restructuring Defenses Affects And Attachment

Rachel S Tattersall

Changing Character Short Term Anxiety Regulating Psychotherapy For Restructuring Defenses Affects And Attachment:

Changing Character Leigh McCullough Vaillant, 1997-01-31 The mechanism of emotional change is central to the field of mental health. Emotional change is necessary for healing the long standing pain of character pathology yet is the least studied and most misunderstood area in psychotherapy and pharmacotherapy. Changing Character at its heart is about emotion: how to draw it out, recognize it and make it conscious; follow its lead and equally important use cognition to guide control and direct our emotional lives. This treatment manual teaches therapists time efficient techniques for changing character and helping their patients live mindfully with themselves and others through adaptive responses to conflictual experiences. Leigh McCullough Vaillant, a nationally recognized expert on short term dynamic psychotherapy, shows therapists how to identify and remove obstacles in one's character: ego defenses that block emotional experience. She then illustrates how the therapist can delve into that experience and harness the tremendous adaptive power provided by emotions. The result she shows us how to have emotions without emotions having their way with us. Vaillant's integrative psychodynamic model holds that the source of psychopathology is the impairment of human emotional experience and expression which includes impairment in drives and beliefs but is seen fundamentally as the impairment of affects. In this short term approach, psychotherapists are shown how to combine behavioral, cognitive and relational theories to make psychodynamic treatment briefer and more effective. Vaillant illustrates how affect bridges the gap between intrapsychic and interpersonal approaches to psychotherapy. Affect, she argues, has the power to make or break relational bonds. Through the regulation of anxieties associated with affects in relation to self and others, therapists can help their patients undergo meaningful character change. A holistic focus on affects and attachment has not been adequately addressed in either traditional psychodynamic theory or cognitive theory. Clearly and masterfully, Vaillant shows therapists how to integrate the powers of cognition and emotion within a dynamic short term therapy approach. [A Therapist's Handbook to Dissolve Shame and Defense](#) Susan Warren Warshaw, 2022-01-17 The effort to surmount shame and formidable defenses in psychotherapy can trigger shame and self doubt in therapists. Susan Warren Warshaw offers a user friendly guide to help therapists move past common treatment barriers. This unique book avoids jargon and breaks down complex concepts into digestible elements for practical application. The core principles of Dynamic Emotional Focused Therapy (DEFT), a comprehensive treatment approach for demonstrable change, are illustrated with rich and abundant clinical vignettes. This engaging, often lyrical handbook emphasizes shame sensitivity to create the safety necessary to achieve profound interpersonal connection. Often overlooked in treatment, shame can undermine the entire process. The author explains the therapeutic transfer of compassion for self, a relational phenomenon that purposefully generates affective expression. She introduces a three step robust framework, The Healing Triad, to orient therapists to intervene effectively when the winds of

resistance arise Chapters clarify Why we focus on feelings How to identify and move beyond shame and anxiety How to transform toxic guilt into reparative actions How to disarm defenses while avoiding ruptures This book is essential reading for both advanced and newly practicing mental health practitioners striving to access the profound emotions in their clients for transformative change

Theory and Practice of Experiential Dynamic Psychotherapy Ferruccio Osimo, Mark J. Stein, 2018-03-29 This book provides an introduction to and history of the experiential dynamic therapies EDT including the ground breaking Intensive Short Term Dynamic Psychotherapy ISTDP of Habib Davanloo and its subsequent development It also describes the essential ingredients of EDT

The Interface Between Psychoanalysis and Neuroscience: The State of the Art Massimo Di Giannantonio, Georg Northoff, Anatolia Salone, 2020-12-11 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office [frontiersin.org/about/contact](https://www.frontiersin.org/about/contact)
