Changing Families Irving E. Sigel, 2012-12-06 In a previous volume *Families as Learning Environments for Children* we presented a series of chapters that dealt with research programs on the role of families as learning environments for children. Those studies were based on empirical data and sought answers to basic research questions with no explicit concern for the application of the results to practical problems. Rather, their purpose was to contribute primarily to conceptualization, research methodology, and psychological theory. Now in this volume we turn our attention to intervention efforts to modify the way a family develops. As in our previous conference, the participants of the working conference on which the present volume is based are research scientists and scholars interested in application. This group is distinct from practitioners, however, whose primary focus is service. Participants in this conference have as their primary interest research into the problems of processes of application. Applied professional issues concerning the lives of families come from many varied sources from some that are distant and impersonal, e.g., the law, to direct face-to-face efforts, educators, therapists. The variety of sources and types of applications are eloquent testimony to the degree to which families are subject to a host of societal forces whose implicit or explicit aim is to modify family functioning. For example, some educators may wish to alter family child rearing patterns to enhance child development; the clinician seeks to help families come to terms and to cope with a schizophrenic child. The list can be extended.

Changing Families, Changing Responsibilities Marilyn Coleman, Lawrence Ganong, 1999-05 This volume explores attitudes and beliefs concerning intergenerational family responsibilities with special focus on families affected by divorce and/or remarriage. For developmentalists, family studies specialists, sociologists, and policy makers.

Children, Changing Families and Welfare States Jane Lewis, 2008-01-01 As welfare states grow up, they begin to think more carefully about their future. Jane Lewis is showing them how best to do so. This stellar collection of articles by top European scholars combines creative thinking about the new social investment state with impressive empirical research on specific forms of

public support for family work Nancy Folbre University of Massachusetts Amherst US The nature of the relationship between children parents and the state has been central to the growth of the modern welfare state and has long been a problem for western liberal democracies Welfare states have undergone profound restructuring over the past two decades and families also have changed in terms of their form and the nature of the contributions that men and women make to them More attention is being paid to children by policymakers but often because of their importance as future citizen workers The book explores the implications of changes to the welfare state for children in a range of countries Children Changing Families and Welfare States examines the implications of social policies for children sets the discussion in the broader context of both family change and welfare state change exploring the nature of the policy debate that has allowed the welfare of the child to come to the fore tackles policies to do with both the care and financial support of children looks at the household level and how children fare when both adult men and women must seek to combine paid and unpaid work and what support is offered by welfare states endeavours to provide a comparative perspective on these issues The contributors have written a book that will be warmly welcomed by scholars and researchers of social policy social work and sociology and students at both the advanced undergraduate and post graduate level

Children and the Changing Family An-Magritt Jensen, Lorna McKee, 2003 The editors maintain that there is a compelling need to explore the child's role in major familial decisions such as divorce moving house employment or childcare

Treating the Changing Family Michele Harway, 1996 Receiving special attention are the structure dynamics and unique problems of families that do not fit the traditional mold Experts in these areas share their findings and provide clinical guidelines for treating bi nuclear single parent gay and lesbian and other nontraditional families

Changing Families, Changing Responsibilities Professor Marilyn Coleman,Lawrence H. Ganong,Marilyn Coleman,1999 This book explores the topic of family obligations following changes in family structure caused by divorce and remarriage Family obligations are commonly defined as the rights and duties that accompany family roles They have been described as the glue that connects generations as well as the oughts and shoulds that surround individual family relationships This book is primarily concerned with normative beliefs about what family members should do for each other It differs from previous accounts of family obligation norms because it specifically focuses on family responsibilities after divorce and remarriage two events that affect an increasing number of families today The authors draw extensively upon the findings of 13 studies of normative beliefs regarding post divorce intergenerational family obligations This book fills a gap in the present literature concerning family obligation It addresses the weaknesses of prior research by focusing on family transitions and by presenting data from

studies that employ contextual methods The content will provide guidance to policymakers and helping professionals who work with families and the unique focus and procedures of the studies are likely to set the standard for future assessments of normative beliefs about family obligations
