Problem-based Learning Ruth Henderson, 2016 Problem based learning PBL is a learner centred approach that was conceptualised for graduate entry medicine to prepare students for patient encounters in clinical practice In PBL under the guidance of a skilled tutor small groups of students engage with ill structured problems to identify gaps in their knowledge and understanding which they then research during the week and return to discuss their findings and to address any inconsistencies With PBL designed for graduate students in a Western context in the 1960s it has been adapted and customised sometimes to such an extent that the approach is no longer recognisable as PBL This excessive adaptation has clouded measurement of its educational effectiveness Notwithstanding PBL has been widely implemented in many disciplines and is now firmly entrenched as a small group collaborative and active learning approach This book discusses the perspectives methods and challenges of problem based learning

How to Use Problem-based Learning in the Classroom Robert Delisle, Association for Supervision and Curriculum Development, 1997 Engaging and motivating students especially the least motivated learners is a daily challenge But with the process of problem based learning PBL any teacher can create an exciting active classroom where students themselves eagerly build problem solving skills while learning the content

necessary to apply them With problem based learning students work begins with an ill defined problem Key to this problem is how it explicitly links something important in students daily lives to the classroom This motivational feature is vital as students define the what where and how of resolving the problem situation Problem based learning may sound potentially chaotic and haphazard but it rests on the firm foundation of a teacher s work behind the scenes The teacher develops a problem long before students see it specifically choosing the skills and content the problem will emphasize and matching those to curriculum and standards Though a PBL problem will have no right answer the teacher structures the experience so that specific learning takes place as students generate the problem solving steps research issues and produce a final product The teacher guides without leading assists without directing

Interdisciplinarity and Problem-Based Learning in Higher Education Annie Aarup Jensen,Diana Stentoft,Ole Ravn,2019-09-14 This book addresses the relation between Problem Based Learning PBL and interdisciplinarity and challenges the often implicit assumption that PBL leads to interdisciplinarity by default The book examines theoretical and philosophical aspects of PBL and interdisciplinary learning The first part of the book conceptualises the notions of problem based learning and interdisciplinary learning and highlights some key overlaps and ways of conceiving of their interrelatedness It discusses the role of problem based medical education in relation to interdisciplinary professionalism in medical education Taking the reader into the realm of techno anthropology the book discusses the role of problems and projects in transgressing disciplines and presents an analysis of three challenges facing new students when entering interdisciplinary and problem based higher education The second part of the book focuses on practicing interdisciplinarity in problem based higher education It explores how the construction of problems in interdisciplinary PBL projects can be seen from the perspectives of multicultural groups and examines group processes in interdisciplinary PBL projects It concludes by taking a closer look at student practices in interdisciplinary PBL and at how students are positioned and position themselves in the complex transdisciplinary PBL project
