**Abstract** This study was aimed to examine the roles of teacher and their challenges in developing students' morality. The data was collected from online database including PubMed, Science Direct and Google. The both qualitative and quantitative studies were reviewed and synthesized in a narrative format. There were seven roles of teachers being found in this study. There are moral model, moral mentor, caregiver, moral value conveyer, facilitator, counsellor and communicator. The challenges of teachers in developing students' morality were also discussed in this study. There are method of teaching and evaluation, lack of interest, qualification of teacher, the expectation of parents and society, the distance between school values and family values and communication with parents.

## 1. Introduction

The disciplinary problem among the students is one of the big challenges for education in our country nowadays. The problem becomes serious when the students lost their moral compass to discern what is right and wrong for their actions in school or out of the school. It is undeniable that the problem is due to the low morality level among the students. Morality is principles that concern the difference between right and wrong action or good and bad behavior. Morality is important and needed to be taught in school to produce students who are balanced and harmonious in intellectual, spiritual, emotional and physical aspects based on the National Philosophy of Education.

Besides the parents who should take the responsibilities in building their children's morality, school also plays an important role as the institution which promotes moral development and transmits the moral values for the

students. Moral Education has been employed in education system since 1983 in Malaysia. In school, teachers act as 'surrogate parents' to the students who take over the responsibilities not only in teaching, but also in building the students' morality. As adult is the guide for the students, it is important for the teachers to have good knowledge of the moral subject, teaching pedagogy and they ought to be mature emotionally and able to interact with the students and communicate with the parents.

Thus, it is important for them to know more about their roles and challenges in developing students' morality. Teachers can have a better direction to play their roles and try to solve the challenges that they face in developing students' morality in the classroom.

In 2017, there were 402 Malaysia schools that were found having disciplinary and drug issues. Although moral education is implemented in every school and the teachers have been teaching and inculcating moral values to the students, the issue of school discipline still makes the headlines (Kok, 2018). When the discipline issue arises, besides the parents, the role of teachers in developing morality of students will be questioned in the society since their expectation on teachers' responsibilities is high nowadays. The responsibilities of teachers are not only teaching students, but also helping students to develop in every aspect including morality.

Nowadays, the role of teachers becomes more challenging. They are the second parents of their students who take their responsibilities in educating and taking care of the students in the school. The expectation on the teachers is getting higher especially when the students are exposed to a variety of resources, social media and gadgets in this era. According to Morgan (2016), students spend too much time online and this will affect their moral development. The aggressive content from the media social will affect students' decision making and conduct in real life situation. Teachers need to know about their responsibilities and play their role in navigating the

## Challenges To Morality:

**Challenges to Morality** Jonathan Harrison,1993      **Ethics and the Environment** Dale Jamieson,2008-01-24 What is the environment and how does it figure in an ethical life This book is an introduction to the philosophical issues involved in this important question focussing primarily on ethics but also encompassing questions in aesthetics and political philosophy Topics discussed include the environment as an ethical question human morality meta ethics normative ethics humans and other animals the value of nature and nature s future The discussion is accessible and richly illustrated with examples The book will be valuable for students taking courses in environmental philosophy and also for a wider audience in courses in ethics practical ethics and environmental studies It will also appeal to general readers who want a reliable and sophisticated introduction to the field      **Challenges to Moral and Religious Belief** Michael Bergmann,Patrick Kain,2014-05-22 Challenges to Moral and Religious Belief contains fourteen original essays by philosophers theologians and social scientists on challenges to moral and religious belief from disagreement and evolution Three main questions are addressed Can one reasonably maintain one s moral and religious beliefs in the face of interpersonal disagreement with intellectual peers Does disagreement about morality between a religious belief source such as a sacred text and a non religious belief source such as a society s moral intuitions make it irrational to continue trusting one or both of those belief sources Should evolutionary accounts of the origins of our moral beliefs and our religious beliefs undermine our confidence in their veracity This volume places challenges to moral belief side by side with challenges to religious belief sets evolution based challenges alongside disagreement based challenges and includes philosophical perspectives together with theological and social science perspectives with the aim of cultivating insights and lines of inquiry that are easily missed within a single discipline or when these topics are treated in isolation The result is a collection of essays representing both skeptical and non skeptical positions about morality and religion that move these discussions forward in new and illuminating directions      New Directions in Ethics Joseph P. DeMarco,Richard M. Fox,2020-07-21 Originally published in 1986 this book examines the extent to which existing ethical theory can provide an adequate framework for the resolution of practical moral issues The contributors all leading moral philosophers provide an authoritative and comprehensive account of developments in ethical theory with emphasis on issues in applied ethics They explain the dominant ethical theories survey major field of applied ethics and speculate about the future of ethics      *Theories of Social and Economic Justice* André Johannes Van der Walt,2005-08-01 The bulk of the contributions in this publication originated in a research project initiated by the Stellenbosch Institute for Advanced Study STIAS in 2002 The book is based on the idea that the attainment of greater social and economic justice specifically in the South African context is strongly influenced by the implications and the coherence of various theories of social and economic justice      The Ethical Challenges of Constant Military Intervention in Nigerian Politics to Nigerian Politicians Robert Emeka Mgbeahurike,1989      **Greedy Business** Leonard Amattey,2015-12-04 The

book GREEDY BUSINESS is a satire directed at human behaviour particularly in regards to human priorities to choose between acts of humanitarianism and greed The author notes that politics indeed is part and parcel of life but no where is it so vividly portrayed than in education and at the work place to satisfy human obsession with greed Then he admitted I cannot deny my role in that but that cannot justify it As individuals we allow Greed to Triumph Morality without humanitarian consideration for others in our efforts to improve quality of our life and that is inexcusable This book is therefore about that aspect of human thinking that can justify individuals doing things to others that they would not like others to do them I wonder how many of us find the necessity to take a step backward to explore the choices we have made to do the things we have done to others that we would not like to be done to us because if done to us they would likely destroy our quality of life Yet some how some of us can justify some of the things we do to others as the result of the choices we have made without humanitarian consideration for them in the name of improving quality of our lives at the expense of our victims Well I did take a step backward and my observations suggest that humans obsession with Greed confirms why we do the things to others that we would not like to be done to us Our tendency to want more and more at the expense of others without humanitarian consideration for the quality of life of others has blinded our moral responsibility to be fair The purpose of writing this book is therefore to share my observations and thoughts with others in the hope that they too may find the need to take a step backward and explore the choices made in the past to do certain things to others that they would not like others to do to them

*Ethical Challenges* Deni Elliott, 2008-06 In a span of 81 days in 1978 Henry Rono broke four world records committing the most ferocious assault on the track and field record books by a middle distance runner in the history of the sport This is what Henry Rono is known for However it is not who Henry Rono is Henry Rono was born a poor Nandi in Kenya s Rift Valley After an accident when he was two doctors believed he would never again walk This would be the first of countless obstacles Rono would have to overcome in order to pursue his two life goals to first become the greatest runner in the world and then to become the best teacher he could be Rono s first goal was accomplished in 1978 when he was considered not only the greatest track and field athlete in the world but also by many to be the world s greatest athlete period His second and greater goal to become a teacher was more difficult in coming Once Rono became a star coaches agents meet directors and corrupt Kenyan athletic officials whose boycotts of the 1976 and 1980 Olympics turned Rono s dreams of Olympic gold into Olympic smoke rings wanted him to serve as their personal moneymaker and so they did everything they could to discourage Rono s pursuit of an education and dream of teaching The corruption and discouragement Rono encountered as well as his alienation and exile from his homeland and family pushed him to 20 years of alcoholism and even occasional homelessness This is the life story of Henry Rono whose descent from triumph to abyss and whose subsequent ascent from abyss to triumph are perhaps steeper than those of any track and field athlete in history

**Moral Issues in Military Decision Making** Anthony E.

Hartle, 2004 Much has changed in warfare in recent years with America now dominant on the international scene and terrorism the new enemy In light of these changes the need for moral grounding in military actions is a more pressing concern than ever When it was originally published *Moral Issues in Military Decision Making* reflected the concerns posed by nuclear stalemate and the lessons of Vietnam In that highly praised work Anthony Hartle outlined the essential elements of the Professional Military Ethic created for American military forces In this new edition he reexamines the moral foundations for America's military leadership in the post 9 11 era Considering world affairs since the first edition the Gulf War Bosnia Afghanistan Iraq 9 11 and the emergence of the United States as an unrivaled military power Hartle explains how these events have raised ethical issues that differ dramatically from those of the Cold War by the war on terrorism homeland defense asymmetric warfare the proliferation of American military interventions and the UN's role in peacekeeping operations Using meticulously analyzed case studies twice as many as in the first edition he considers such moral dilemmas as torture challenging superior officers use of overwhelming force and responding to fire in the presence of civilian shields In this revision Hartle examines further the status of professional military ethics in light of current affairs changes in the articulation of military values and recent research In a new chapter on human rights he relates moral principles directly to values embedded in the Constitution and argues that overwhelming American military power cannot succeed unless it is accompanied by the moral force of the values it seeks to protect difficulties of applying conventional laws of war and human rights doctrine in military operations Hartle convincingly shows that national security is as much about the preservation of moral principles as it is about the protection of America's citizens and borders His book demonstrates that the American military must continue to observe those principles in order to be effective in its primary mission
