Honig,1985 **Schooling Corporate Citizens** Ronald W. Evans,2014-11-27 Schooling Corporate Citizens examines the full history of accountability reform in the United States from its origins in the 1970s and 1980s to the development of the Common Core in recent years Based in extensive archival research it traces the origins and development of accountability reform as marked by key government and business led reports from A Nation at Risk to No Child Left Behind and Race to the Top By using the lens of social studies and civic education as a means to understand the concrete impacts of accountability reforms on schools Evans shows how reformers have applied principles of business management to schools in extreme ways damaging civic education and undermining democratic learning The first full length narrative account of accountability reform and its impact on social studies and civic education Schooling Corporate Citizens offers crucial insights to the ongoing process of American school reform shedding light on its dilemmas and possibilities and allowing for thoughtful consideration of future reform efforts In the Name of Excellence Thomas Toch,1992 Drawing on a rich store of material that includes visits to nearly sixty public schools nationwide and hundreds of interviews conducted from the classroom to the White House Thomas Toch one of America s leading educational journalists has produced an award winning book of impressive breadth Measuring its progress in clear compelling prose Toch offers readers the full story of today s school reform movement He reveals that there is intense opposition within the ranks of public educators to the movement s academic aims that the damage inflicted on the nation s students by standardized testing is far greater than has been generally reported and that new graduation requirements have failed millions of students Toch also provides a detailed account of the role played by the powerful National Education Association the nation s largest teachers union while shedding new light on controversial topics such as school choice and why students drop out of school Finally and of crucial importance to all who are committed to improving our schools the book proposes a further agenda for the nation s school reformers Public education today stands at a crucial crossroads In the Name of Excellence explains why and reveals the prospects for the nation s schools in the years ahead It is essential reading for parents educators and policymakers alike *The Library Quarterly* ,1986 Includes section Reviews *Library Journal* ,1985 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately An Education in Politics Jesse H. Rhodes,2012-04-21 Since the early 1990s the federal role in education exemplified by the controversial No Child Left Behind Act NCLB has expanded dramatically Yet states and localities have retained a central role in education policy leading to a growing struggle for control over the direction of the nation s schools In An Education in Politics Jesse H Rhodes explains the uneven development of federal involvement in education While supporters of expanded federal involvement enjoyed some success in bringing new ideas to the federal policy agenda Rhodes argues they also encountered stiff resistance from proponents of local control Built atop existing decentralized policies new federal reforms raised difficult questions about which level of government bore ultimate responsibility for improving schools Rhodes s argument focuses on

the role played by civil rights activists business leaders and education experts in promoting the reforms that would be enacted with federal policies such as NCLB It also underscores the constraints on federal involvement imposed by existing education policies hostile interest groups and above all the nation s federal system Indeed the federal system which left specific policy formation and implementation to the states and localities repeatedly frustrated efforts to effect changes national reforms lost their force as policies passed through iterations at the state county and municipal levels Ironically state and local resistance only encouraged civil rights activists business leaders and their political allies to advocate even more stringent reforms that imposed heavier burdens on state and local governments Through it all the nation s education system made only incremental steps toward the goal of providing a quality education for every child **The Great School Debate**

Learning from the Past Diane Ravitch,Maris A.
