Theodore H. Cohn

Change And Conflict In The New Economy:

Surviving the New Economy John Amman, Tris Carpenter, Gina Neff, 2015-12-03 The dot com boom of the late 1990s marked the coming of age of the much heralded New Economy an economic technological and social transformation that was decades in the making A highly mobile and in many cases highly compensated workforce faces a multitude of new risks Jobs are no longer secure nor insulated from global competition employer provided health benefits are drying up and retirement planning is almost entirely the responsibility of employees themselves This timely book examines the challenges facing high tech workers and other professionals and the relevance of these struggles for the future of the economy Written by leading experts Surviving the New Economy shows how people working in technology industries are addressing their concerns via both traditional collective bargaining and through innovative actions Using case studies from the United States and abroad the authors in this collection examine how highly skilled workers are surviving in a global economy in which the rules have changed and how they are reshaping their workplaces in the process

Sustainability and the New Economics Stephen J. Williams, Rod Taylor, 2021-12-09 This multidisciplinary book provides new insights and hope for sustainable prosperity given recent developments in economics but only if swift and strong actions consistent with Earth's biophysical limits and principles of justice are universally taken It is one thing to put limits on resource throughput and waste generation to conform with the ecosphere's biocapacity It is another thing to efficiently allocate a sustainable rate of resource throughput and ensure it is equitably distributed in the form of final goods and services While the separate but interdependent decisions regarding throughput distribution and allocation are the essence of ecological economics dealing with them in a world that needs to cure its growth addiction requires a realistic understanding of macroeconomics and the fiscal capacity of currency issuing central governments Sustainable prosperity demands that we harness this understanding to carefully regulate the rate of resource throughput and manipulate macroeconomic outcomes to facilitate human flourishing The book begins by outlining humanity's current predicament of gross ecological overshoot and laments the half century of missed opportunities since *The Limits to Growth* 1972 What was once economic growth has become in many high income countries uneconomic growth additional costs exceeding additional benefits which is no longer advancing wellbeing Meanwhile low income nations need a dose of efficient and equitable growth to escape poverty while protecting their environments and the global commons The book argues for a synthesis of our increasing knowledge of the ecosphere's limited carrying capacity and the power of governments to harness transform and distribute resources for the common good Central to this synthesis must be a correct understanding of the difference between financial constraints and real resource constraints While the latter apply to everyone the former do not apply to currency issuing central governments which have much more capacity for corrective action than mainstream thinking perceives The book joins the growing chorus of authoritative voices calling for a complete overhaul of the dominant economic system We conclude with policy recommendations based on a new economics that if

implemented would come close to guaranteeing a sustainable and prosperous future Upon reading this book at least one thing should be crystal clear business as usual is not a viable option *Aspects of Urbanization in China* Gregory Bracken, 2012 China's opkomst als wereldmacht is een van de ingrijpendste gebeurtenissen van deze tijd Honderden miljoenen mensen zijn de armoede ontvlucht dankzij de snelle industrialisatie van het land De wonderbaarlijke economische groei van China heeft zijn nadelen iets wat vaak het meest pijnlijk duidelijk wordt in de steden Deze studie is geschreven door wetenschappers uit verschillende disciplines waaronder architectuur stedenbouw sociale wetenschappen aardrijkskunde en antropologie Een deel van de auteurs behandelt de mondiale ambities van de steden terwijl andere hun culturele en architecturale uitingen onderzoeken *Postwar Vietnam* Hy V. Luong, 2003 This historically grounded examination of the dynamics of contemporary society in Vietnam including cultural political and economic dimensions focuses on dynamic tensions both within society and among societal forces the state and global capital **Climate Justice and Human Rights** Tracey Skillington, 2016-11-25 This book shows that escalating climate destruction today is not the product of public indifference but of the blocked democratic freedoms of peoples across the world to resist unwanted degrees of capitalist interference with their ecological fate or capacity to change the course of ecological disaster The author assesses how this state of affairs might be reversed and the societal relevance of universal human rights rejuvenated It explores how freedom from want war persecution and fear of ecological catastrophe might be better secured in the future through a democratic reorganization of procedures of natural resource management and problem resolution amongst self determining communities It looks at how increasing human vulnerability to climate destruction forms the basis of a new peoples powered demand for greater climate justice as well as a global movement for preventative action and reflexive societal learning
