Anderson, J. Wesley Little, 1974-01-01      *Stability and Change* Sheila Rosenblum, Karen Seashore Louis, 2013-03-13 Nearly a century ago Emile Durkheim founded the sociology of education on the French cultural and structural premise that the function of educators is to transmit culture from one generation to the next The clarity of his vision was aided by the era the place and the actors in the learning environment His was an era when the relatively seamless web of western culture although ripping and straining was still intact The place post Napoleonic France was vertically stratified and elaborately structured And the teachers had reason to think they were agents of authority whereas most students during school hours at least behaved as if they were the objects of that authority Underlying the very notion of a sociology of education then was a visible and pervasive aura of a system and order that was culturally prescribed Scholars of American education have yearned for such systems before and since Durkheim Every European and English model has been emulated in a more or less winsome manner from the Boston Latin School of the 1700s to the Open Education programs of the 1960s In the last quarter century of research it has begun to dawn on us however that no matter how hard American educators try they do not build a system      **Aspects of Educational Change** Ivor Morrish, 2013-05-13 In recent years teachers have realized that change has become a permanent factor on the educational scene and therefore its operation or mechanism must not just be accepted or even rejected but above all understood This book presents an approach towards some real understanding of educational changes and innovations A number of mechanisms and processes are discussed and analysed in an attempt to present some sort of overview of the agents involved in change an analysis of the major characteristics of resisters and innovators an account of the traits and functions of innovative institutions and a description of three particular models which delineate the way in which change occurs In the final section of the text attention is given to some contemporary educational innovations and some suggestions provided for dealing with problems involved in their evaluation      **Innovation and change in English language education** Ken Hyland, Lillian L C Wong, 2013-06-19 Questions about what to teach and how best to teach it are what drive professional practice in the English language classroom Innovation and change in English language education addresses these key questions so that teachers are able to understand and manage change to organise teaching and learning more effectively The book provides an accessible
