Changers 2 Our Obligation To The Fu:

In Fairness to Future Generations Edith Brown Weiss, 2025-01-27 Professor Weiss combines thorough research and careful analysis with imaginative solutions and a moral fervor. She shows how rules of international law can be applied in an intertemporal dimension and how the basic principles of the intergenerational equity can be developed to provide new standards for human behavior. She manages to communicate to the reader not only that the situation is getting desperate but also that human intelligence can in time devise adequate remedies without destroying completely our way of life. Louis B. Sohn, Woodruff Professor of International Law. Published under the Transnational Publishers imprint. **New York Court of Appeals. Records and Briefs.** New York (State)., **The Ethics of Tourism** Brent Lovelock, Kirsten Lovelock, 2013-06-26 There are increasingly strident calls from many sectors of society for the tourism industry, the world's largest industry, to adopt a more ethical approach to the way it does business. In particular, there has been an emphasis placed on the need for a more ethical approach to the way the tourism industry interacts with consumers, the environment, with indigenous peoples, those in poverty, and those in destinations suffering human rights abuses. This book introduces students to the important topic of tourism ethics and illustrates how ethical principles and theory can be applied to address contemporary tourism industry issues. A critical role of the book is to highlight the ethical challenges in the tourism industry and to situate tourism ethics within wider contemporary discussions of ethics in general. Integrating theory and practice, the book analyses a broad range of topical and relevant tourism ethical issues from the urgent 'big picture' problems facing the industry as a whole (e.g. air travel and global warming) to more micro-scale everyday issues that may face individual tourism operators or indeed individual tourists. The book applies relevant ethical frameworks to each issue, addressing a range of ethical approaches to provide the reader with a firm grounding of applied ethics from first principles. International case studies with reflective questions at the end are integrated throughout to provide readers with valuable insight into real-world ethical dilemmas, encouraging critical analysis of tourism ethical issues as well as ethically determined decisions. Discussion questions and annotated further reading are included to aid further understanding. **The Ethics of Tourism: Critical and Applied Perspectives** is essential reading for all Tourism students globally. **Regulating Global Climate Change** Bharat H. Desai, 2023-08-15 For some years now, growing scientific warnings have continued to strengthen the belief that an unprecedented global warming is underway and that only an urgent, system-wide transformation can avoid climate disaster. In his June 2, 2022 address to the Stockholm 50 Conference, the UN Secretary General Antonio Guterres construed climate emergency as one of the key drivers of the triple planetary crisis. Despite this, the overriding impression left by COP27 held in Sharm el Sheikh in November 2022 was of a divided institution floundering and nowhere close to realizing its stated aim of stabilizing greenhouse gas concentrations at a level that would prevent dangerous interference with the climate system. While prognoses and projections set the stage for a climate change emergency, the legally ordained platform for institutionalized

cooperation to deal with the problem seems always to be achieving too little too late This book *Regulating Global Climate Change* presents articles from the special climate change issue of the journal *Environmental Policy and Law* vol 52 5 6 2022 published to mark the 30th year of the UNFCCC The book provides a sequel to two previously published IOS Press books *Our Earth Matters* 2021 and *Envisioning Our Environmental Future* 2022 and the contributions included here seek to make sense of the marathon climate change regulatory process The book is organized into 5 parts climate normativity regime at the crossroads climate justice factoring gender and the Paris conundrum Urging scholars and decision makers to consider the approach process tools and techniques used to address the primary objective of the UNFCCC as well as strongly calling for a decisive new normative push from common concern to planetary concern the book will be of interest to all those involved in the process of tackling and dealing with the adverse effects of global climate change Bharat H Desai is Professor of International Law Jawaharlal Nehru Chair in International Environmental Law and Chairperson of the Centre for International Legal Studies at School of International Studies of Jawaharlal Nehru University New Delhi Editor in Chief of the global journal *Environmental Policy and Law* Amsterdam IOS Press
