The Innovative Pathway on Sustainable Culture Tourism Tatjana Pivac, Rui Alexandre Marçal Dias Castanho, Eliana

Martinelli, Eduardo Cândido Cordeiro Gonçalves, 2025-08-01 This book explores how tourism can drive positive change in our world. It explores the important connections between sustainability, tourism, and cultural preservation, showing how these elements interact and influence each other. By examining the effects of tourism on local communities and environments, it emphasizes that responsible tourism can truly be a force for good. This book features case studies from countries like Saudi Arabia, Portugal, and China. These examples illustrate innovative approaches to support local communities while preserving their cultural heritage. Each case study offers a look at how tourism can help enhance social and economic development while also keeping a balance between cultural and environmental needs. This book is for everyone: policymakers, scholars, and industry professionals alike. It brings together ideas from various fields and provides practical strategies for responsible tourism. By inviting readers to rethink tourism's role in our increasingly globalized world, it highlights its potential to encourage environmental stewardship and strengthen local identities, ensuring that travel enriches our lives and helps preserve the cultural and natural treasures we hold dear.

Slow Travel and Tourism Janet Dickinson, Les Lumsdon, 2010 It is widely recognized that travel and tourism can have a high environmental impact and make a major contribution to climate change. It is therefore vital that ways to reduce these impacts are developed and implemented. Slow travel provides such a concept, drawing on ideas from the slow food movement with a concern for locality, ecology, and quality of life. The aim of this book is to define slow travel and to discuss how some underlying values are likely to pervade new forms of sustainable development. It also aims to provide insights into the travel experience; these are explored in several chapters which bring new knowledge about sustainable transport, tourism, and travel from across the world. In order to do this, the book explores the concept of slow travel and sets out its core ingredients, comparing it with related frameworks such as low carbon tourism and sustainable tourism development. The authors explain slow travel as holiday travel where air and car transport is rejected in favour of more environmentally benign forms of overland transport which generally take much longer and become incorporated as part of the holiday experience. The book critically examines the key trends in tourism transport and recent climate change debates, setting out the main issues facing tourism planners. It reviews the potential for new consumption patterns as well as current business models that facilitate hyper mobility. This provides a cutting edge critique of the upstream drivers to unsustainable tourism. Finally, the authors illustrate their approach through a series of case studies from around the world featuring travel by train, bus, cycling, and walking. Examples are drawn from Europe, Asia, Australia, and the Americas. Cases include the Eurostar train as an alternative to air travel, walking in the Appalachian Trail, US, the Euro Velo network of long distance cycling routes, canoe tours on the Gudena River in Denmark, sea kayaking in British Columbia, Canada, and the Oz Bus Europe to Australia.
