Changing Perspectives in the History of Science Mikuláš Teich, Robert Maxwell Young, 1973 **Changing Perspectives in the History of Science : Essays in Honor of John Needham** Mikulas Teich, 1973-01-01 **The Rise and Decline and Rise of China** MISTRA MISTRA, 2015-05-10

The Rise and Decline and Rise of China Searching for an Organising Philosophy represents a new and promising approach to Africa China relations What is most impressive is that it is an encounter between African and Chinese thought but this encounter is not just a set of stale comparisons of philosophical beliefs This study places the concepts and attitudes in both China and Africa in their socio political contexts in an attempt to provide a sophisticated sensitive and usable history This attempt yields dividends especially for the primary audience of Africans as it gives a way of learning from the vast history of Chinese experience without reducing African experience to insignificance or irrelevance as has happened so often in dialogues between Africa and the West This book will be of interest to anyone from within Africa interested in engaging with China as a complex and nuanced place a place of challenge creativity and opportunity

Joseph Needham's Contribution to the History of Science and Technology in China Gregory Blue, 1981 Alchemy Revisited Z.R.W.M. von Martels, 2023-12-14

Alchemy revisited is an important collection of papers presented at an international congress held at the University of Groningen in April 1989 Among the scholars whose work is presented here are Prof N Sivin Chinese alchemy Prof B Vickers res and verba in Greek alchemy Profs K Figala and U Neumann with new material on Michael Maier Prof A G Debus on iatrochemistry and the chemical revolution and Prof M Crosland on alchemy in the Age of Enlightenment They and the other contributors give an unusually comprehensive survey of Indian Greek Arabic and European alchemy which will serve as an authoritative scholarly introduction to the subject for historians of science and related literature Prof J D North contributes a short lecture on Chaucer s Canon s Yeoman s Tale

Kepler's Tübingen Charlotte Methuen, 1998 Using previously unstudied sources this interdisciplinary study considers theology and the beginnings of modern science at the University of Tübingen in the time of Johannes Kepler 1571-1630 The author casts light upon the origins of modern scientific method by examining the relationship between theology astronomy and dialectics at the university in the work of Kepler's teachers Studies of Kepler

generally treat him as a precursor of the modern scientist the influences upon him are identified as Platonist or Pythagorean and his theological interests have often been ignored or considered as a mystical aberration unworthy of in depth treatment There has been no serious attempt to place Kepler s work in the wider tradition of mainstream 16th century thought This study portrays and analyses the influences and ideas which permeated the life of the university in Tübingen in the second half of the 16th century and places them in relationship to the theology of Martin Luther and Philip Melanchthon It pays particular attention to the use of theological concepts astronomical observations logical demonstrations and the categories of physics and to the interplay between them 日本学術会議(Japan),1975 **History of Indian Science, Technology, and Culture, A.D. 1000-1800** Abdur Rahman,Project of History of Indian Science, Philosophy, and Culture,1999 Cumulative Bibliography of Victorian Studies ,1970 Homo Faber C.A.
