Changing Architectural Education Towards A New Professionalism:

Changing Architectural Education David Nicol, Simon Pilling, 2000 Architectural education is under pressure to meet the demands of an evolving construction industry and to cater to the increasingly varied career destinations of graduates How should architectural education respond to these professional challenges How can students be better prepared for professional practice These questions are the focus of this book which brings together contributions from a wide range of authors from both the UK and the USA working in the fields of architectural education architectural practice and educational research *Practice and Progress in Social Design and Sustainability* Siu, Kin Wai Michael, Wong, Yin Lin, 2018-07-06

Designers provide creative solutions for user problems and identify the needs of users in a given environment However it is often difficult to understand the social design of a product or service Practice and Progress in Social Design and Sustainability is a critical scholarly resource that provides groundbreaking research on social contributions to design Featuring coverage on a broad range of topics such as rural sustainability ecological farmhouse designs and community public spaces this book is geared towards architects designers program planners entrepreneurs and engineers seeking information about design for resolving social issues **Collaboration and Student Engagement in Design Education**

Tucker, Richard, 2016-09-12 In order for educational systems not to become stagnant teaching strategies must be routinely re evaluated Not only does this optimize the learning process but it enhances the overall experience for the students Collaboration and Student Engagement in Design Education is a pivotal reference source for the latest scholarly research on the implementation of teamwork between architecture students in design courses to enrich knowledge attainment and boost creativity Highlighting pedagogical insights into team building and relevant case studies this book is ideally designed for educators students administrators and professionals interested in the development of effective design programs

Architecture and Design for Industry 4.0 Maurizio Barberio, Micaela Colella, Angelo Figliola, Alessandra Battisti, 2023-10-06 This book collects contributions of forefront research and practices related to the use of the enabling technologies of Industry 4.0 in the architecture and design fields and their impact on the UN's Sustainable Development goals The book is structured into three sections research practice and technologies with the goal of creating a new framework useful for widespread awareness necessary to initiate technology transfer processes for the benefit of the public sector universities research centers and innovative companies and a new professional figure capable of controlling the entire process is essential Thus the book chapters arouse a series of relevant topics such as computational and parametric design performance based architecture data driven design strategies parametric environmental design and analysis computational and parametric structural design and analysis AI and machine learning BIM and interoperability VR and AR digital and robotic fabrication additive manufacturing and 3D printing R D and entrepreneurship circular architecture and didactics In the post digital era where the essence of design lies in the control and information of the process that holistically involves all

the aspects mentioned above rather than in formal research it is necessary to understand technologies and analyze the advantages that they can bring in terms of environmental sustainability and product innovation

The Crit: An Architecture Student's Handbook Charles Doidge, Rachel Sara, Rosie Parnell, 2007-06-07 The architectural crit review or jury is a cornerstone of architectural education around the world The defence of ideas drawings and models in an open format before staff and peers is intended to be a foreground for healthy creative debate but many students view it as hostile confrontation an ego trip for staff and humiliation for them This accessible and immensely enjoyable book guides students through this academic minefield This fully updated edition includes advice and suggestions for tutors on how to model a crit around a broad range of learning styles as well as a new section aimed at students with learning disabilities to ensure that the process is constructive and beneficial for all architecture and design scholars Packed with practical tips from tutors students and professionals this reassuringly honest book will prepare students to build more creative relationships with clients and users across the industry Also in the Seriously Useful Guides series Practical Experience The Dissertation The Portfolio

Creating a Roadmap Towards Circularity in the Built Environment Luís Bragança, Meri Cvetkovska, Rand Askar, Viorel Ungureanu, 2023-12-06 This open access book summarizes the research being pursued as part of the COST Action CA21103 titled Implementation of Circular Economy in the Built Environment Circular B which aims to define the methodology to develop a common circularity framework for inclusive application and assessment in new and existing buildings to support decision making for all value chain stakeholders and appraise the implementation level of the European Circular Economy Action Plan CEAP The Action is increasingly gaining interest worldwide bringing multidisciplinary young and experienced researchers together to share the latest studies and develop new knowledge Consisting of 17 chapters corresponding to the conference themes the book analyses and discusses topics such as Circular Economy CE best practices design strategies for circular buildings circular materials and products adaptive reuse of existing buildings recovery and reuse of salvaged materials and products case studies of current applications and trends barriers against CE implementation in buildings efficient waste and circular resource management circular lifecycle management and decision making stakeholders relationships CE supporting policies and barriers circular business models criteria KPIs and assessment models for circular buildings CE criteria in sustainability frameworks digitalization and BIM for enhanced circularity of buildings and building materials and standardization of CE definitions in buildings

Journal of Ethnographic and Qualitative Research ,2007 *The Architects' Journal* ,2000 **The Architecture Annual** ,2000 *Ethnographic and Qualitative Research in Education* Patricia Brewer, Michael Firmin, 2006 Inquiry into the complexity of human interaction is the basis of educational research How do we determine the circumstances of interaction that lead to relevant and productive learning environments How can we begin to address the complexities of diversity in our interactions with learners parents and each other How do we obtain needed skills for interpreting the dialogue that accompanies our work The first part of this volume

chapters 1-6 explores the theme of communication and interaction in very diverse settings from the tennis court to the architect's studio. Popov's two studies review cultural factors associated with student life on college campuses. Hughey and Sims while Sperry et al and Yamakawa et al focus specifically on the role of dialogue. Action research that which is designed to fill the gap between theory and practice is represented in the second section. chapters 7-12 Here researchers explore a variety of professional concerns but are particularly focused on improvement of teacher education whether at the point of preparation. Capobianco et al early professional experiences. Hamilton and Rademaker on teacher continuing education. Hampton et al and Raffanti. Palladino and Swafford examine educator family relationships and factors that may affect that aspect of professional work. The collection appropriately closes with a series of projects that examine the instruction of qualitative research methods at colleges and universities. chapters 13-15 As Peter Demerath notes in the keynote address ethnographic and qualitative research methods continue to be scrutinized heavily in this age of education accountability. Current trends and predictions of what works rarely agree that evidence from qualitative inquiry is sufficient to explore important issues of teaching and learning. Through qualitative study however educators can systematically evaluate the learning environment the instructional methods and the results of students' collective experience. Improving the instruction of qualitative methods becomes an essential part of our curriculum as well as a tool for our own professional practice. In this section Firmin provides an introduction to teaching the reiterative process of qualitative inquiry and Zagumny reports on initiatives to promote qualitative inquiry in a technology school setting that prefers quantitative inquiry. Hockett et al provide a rich description of double loop learning through a research project that documents the experiences of instructors and students who are engaged in a qualitative methods course. All represent the inextricable link between process and content that which forms the foundation of qualitative research in education.
