Chaos In Cucamonga:

Chaos in Cucamonga John Bear,2004-03-01 The world's first robot soldier is being developed at a missile factory in Cucamonga California. The program's schedule is accelerated by a casual order from the president causing design shortcuts a torrent of test failures cost increases and hysterical management. The army general replaces the colonel in charge and the contractor assigns two new managers a rising design engineer to fix the robot's reliability problem and a gorgeous MBA to repair the cost and schedule mess. These two see more and more of each other begin to trade knowledge from their vastly different backgrounds and dazzle the brass with their energy. Their efforts collide with the bewildering apparatus and often bizarre intrigues of the military industry complex. The story illustrates the famous butterfly effect of Chaos Theory.

Navigate the Chaos in 2020 Michael Edmondson, Ph.D.,2019-11-08 This publication represents over ten years of note taking involving backstories, historical events and academic research. Once the notes exceeded 200 the idea of a daily question came to mind. This is the third year for the Navigate the Chaos publication that contains 366 daily questions to consider. 2020 is a leap year. Since self-awareness forms the foundation for both personal growth and professional development, these questions served as a daily reminder to think about a critical issue related to your growth as a person and as a professional. Before you start your day during lunch or prior to going to bed, consider asking yourself the daily Navigate the Chaos question. See if you can find a few minutes to reflect upon a specific trait, habit, or idea. Dedicating a few minutes each day can help you increase your self-awareness as you look to grow personally and professionally.

Wall of Flame Erich Krauss,2007-08-24 A dramatic look from the front lines at the most devastating fire siege in California history. With over seven miles of urban wildland interface unburned for thirty years and beautiful homes lacing in and out of its picturesque hilly terrain, Rancho Cucamonga was a powder keg one that finally exploded in October 2003 with a ferocity no one could have expected. Now Erich Krauss brings you to the ever-shifting front lines of the battle against the catastrophic inferno, the rugged terrain, and the ferocious winds where municipal and wildland firefighters joined forces to save thousands of homes and lives. Wall of Flame recalls the unprecedented events surrounding the Grand Prix Fire, revealing the moments of apparent indecision, the lack of coordination, and even how local, state, and federal firefighters, each with missions that at times opposed one another, put their differences aside for the greater good in order to save Southern California. With each passing hour, the fire grew larger and their task more immense. Mistakes were made. Plans collapsed. Even the most seasoned firefighters felt the world close in. But they persevered. After all, it was their city, their homes, and their loved ones they were entrusted to protect. Their community was

counting on them to save their homes and all the history they had wrapped up in them This was a battle they could not afford to lose
