Annual Report Education Development Center,1989 *NASA Office of Space Science Education and Public Outreach Conference* Carolyn Narasimhan,2004 *Science for the Elementary and Middle School* Edward Victor,Richard Dean Kellough,2000 Text is appropriate for Elementary or Middle School Science Methods This highly successful science methods text provides current sources of pedagogy subject matter content and exploratory activities in science that are essential for a complete science course The content correlates to the NSES standards examines the most effective teaching methods and explores how science instruction can help children improve their knowledge and information processing skills The experienced authors share the best of practice the most useful research findings and their richest experiences Appropriate for education courses the text is designed to instruct future educators in the fundamentals of teaching science at the elementary and middle school levels Presents strategies that integrate learning Provides illustrations of how they may be used Increases the emphasis on how students can access science information and make sense of it through the use of visual and technological tools More than 750 activities and experiments for the elementary school curriculum Includes exploratory activities that teachers can use immediately These useful activities ensure that students take a han *The Principalship* Lawrence F. Rossow,Linda Sue Warner,2000 In this book Rossow and Warner incorporate the best of all the advances in the theories and developments in the field on study devoted to the principalship since 1990 Although the titles to the eleven chapters remain the same as those found in the first edition much has changed Since many areas addressed in the first edition are nearly timeless some topics are presented again One of the basic premises in the first edition came from a clear change in the direction the principalship was taking in the late 1980s and early 1990s There was a movement away from principal as manager of people and a building to principal as instructional leader Unlike a number of movements in education which turn out to be merely fads there has been no change in this direction for principalship The literature and the training for future principals continues to capture the concept that principals must be instructional leaders while attending to the safety of students and teachers This book will assist those responsible for the education of principals as well as help those already in the field become updated on the newest advances in the discipline Indigenous Knowledge and Education Malia Villegas,Sabina Rak Neugebauer,Kerry R. Venegas,2008 This book brings together essays that explore Indigenous ways of

knowing and that consider how such knowledge can inform educational practices and institutions Indigenous Knowledge is resiliently local in character and thus poses a distinct contrast to the international more impersonal system of knowledge prevalent in Western educational institutions In the words of Mik maq scholar Marie Battiste a leading proponent of Indigenous Knowledge and a contributor to this volume Indigenous Knowledge expresses the vibrant relationships between the people their ecosystems and the other living beings and spirits that share their lands Indigenous Knowledge and Education argues that such knowledge has much to offer schools and students in the United States and beyond The volume examines a wide range of Indigenous cultures and educational settings including Native American Haitian Mexican African and Australian The essays are grouped into three themes that exemplify many Indigenous cultures struggle strength and survivance the latter a notion of survival that emphasizes remembrance regeneration and spiritual renewal Each of these themes is explored in a rich array of articles and capped with new essays by Marie Battiste Gregory A Cajete and Bryan McKinley Jones Brayboy A wide ranging and persistently stimulating volume Indigenous Knowledge and Education casts contemporary theories and debates about education in a new and essential light Contributors David Wallace Adams Lilia I Bartolome Marie Battiste Bryan McKinley Jones Brayboy Gregory A Cajete Fernando Cardenal Munir Fasheh Sandy Marie Anglas Grande Josiane Hudicourt Barnes Susan M Kardos Richard Katz Kenneth Liberman K Tsianina Lomawaima Richard Maclure Valerie Miller Leona Okakok and Ramon Eduardo Ruiz Edited by Malia Villegas Sabina Rak Neugebauer and Kerry R Venegas
