Challenging Democracy International Perspectives On Gender Education And Citizenship:

Challenging Democracy Madeleine Arnot, Jo-Anne Dillabough, 2014-02-04 This collection establishes a highly topical new international field of study that of gender education and citizenship It brings together for the first time important cutting edge research on the contribution of the educational system to the formation of male and female citizens It shows how gender relations operate behind apparently neutral concepts of liberal democratic citizenship and citizenship education The editors asked leading international educationalists to describe the theoretical frameworks and methodologies they used to research gender and citizenship Challenging Democracy suggests ways in which the educational system could help develop genuinely inclusive democratic societies in which men and women play an equal role in shaping the meaning of citizenship

Educating the Gendered Citizen Madeleine Arnot, 2009 Globalisation and global human rights are the two major forces in the twenty first century which are likely to shape the sort of learner citizen created by the educational system Schools will be expected to prepare young men and women for national as well as global citizenship Male and female citizens will need to adapt to new social conditions only some of which will encourage gender equality This book offers a unique introduction to the contribution that sociological research on the education of the citizen can make to these national and global debates It brings together for the first time a selection of influential new and previously published papers by Madeleine Arnot on the theme of gender education and citizenship It describes feminist challenges to liberal democracy the gendered construction of the good citizen and citizenship education it explores the implications of social change for the learner citizen and offers alternative gender sensitive models of global citizenship education Reaching right to the heart of current debates the chapters focus on feminist democratic values in education teachers constructions of the gendered citizen European languages of citizenship the inclusion of women s rights into English citizenship textbooks gender struggles for equality in school pedagogy and curriculum the implications of personalised learning for the individualised learner citizen globalisation and the construction of a global ethic for citizenship education It will be an invaluable text for all those interested in citizenship education gender studies sociology of education educational policy studies critical pedagogy and curriculum studies and international or comparative education *Beyond the Comparative* John C. Weidman, W. James

Jacob, 2012-01-01 We are pleased to introduce this inaugural volume in the PSCIE Series *Beyond the Comparative Advancing Theory and Its Application to Practice* which expands on the life work of University of Pittsburgh Professor Rolland G Paulston 1929 2006 Recognized as a stalwart in the field of comparative and international education Paulston s most widely recognized contribution is in social cartography He demonstrated that mapping comparative international and development education CIDE is no easy task and depending on the perspective of the mapper there may be multiple cartographies to chart The 35 contributors to this volume representing a range of senior and junior scholars from various CIDE backgrounds and perspectives celebrate the life and work of Paulston by addressing issues perspectives and approaches related to charting

the future course of the field The volume reports on new research in several genres as well as conceptual analysis As the title suggests authors were encouraged to go beyond established canons of CIDE The cover art The CIDE Theoretical Compass was conceptualized by the editors and depicts that theory selection and theory generation are an ongoing and important process in comparative international and development education CIDE The image was designed by artist Natalie Jacob which positions the CIDE Theoretical Compass over Rolland G Paulston's 1993 concentric circle map *Reproducing Gender* Madeleine Arnot, 2002-01-17 These essays cover Arnot's early work on gender codes and her critique of Bernstein her analysis of state educational policy in Britain and her work on theorizing a feminist democratic education and ideal citizenship *Citizenship, Democracy and Lifelong Learning* Carolyn Medel-Añonuevo, Gordon Mitchell, 2003 Education, Asylum and the 'Non-Citizen' Child Halleli Pinson, Madeleine Arnot, Mano Candappa, 2010-04-29 Refugees are physically and symbolically out of place their position forcing receiving states to address issues of rights and moral obligations This book is concerned with asylum seeking and refugee children in the UK whose presence represents a litmus test of state commitment to human rights equality and justice for all children Education, Globalization, and Social Change Hugh Lauder, 2006 Education is seen as central to economic competitiveness the reduction of poverty and inequality and environmental sustainability The editors have selected key writings that examine the social and economic limits and possibilities of education in addressing these fundamental problems This new reader establishes the field of sociology of education with a particular focus on papers that analyse the nature and extent of globalization in education A general introduction presents the key concepts in the sociology of education and outlines the major theories and debates especially in relation to globalization Each section is accompanied by a part opener explaining and contextualizing the readings within a larger educational and sociological context *New Acquisitions* Unesco Institute for Education. Documentation Centre and Library, 2001 *Gender, Education Reform, and Teachers' Labor in Argentina* Sarah Ann Robert, 2008 *Educational Evaluation* María Ortiz, Claudia Rubio, 2009 There are two common purposes in educational evaluation which are at times in conflict with one another Educational institutions usually require evaluation data to demonstrate effectiveness to funders and other stakeholders and to provide a measure of performance for marketing purposes Educational evaluation is also a professional activity that individual educators need to undertake if they intend to continuously review and enhance the learning they are endeavouring to facilitate This book presents new research on issues of vital importance to this field *Citizenship and Citizenship Education in Australia* Joan Geralyn DeJaeghere, 2002 *Sociological Abstracts* Leo P. Chall, 2003 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters dissertations and conference papers **Doing Democracy** Darren E. Lund, Paul R. Carr, 2008 In this provocative collection of essays with a distinctly critical and

nuanced approach to how democracy is taught learned understood and lived authors from four continents share their visions on how democracy needs to be cultivated critiqued demonstrated and manifested throughout the educational experience The collective concern is how we actually do democracy in education The essays argue that democracy must be infused in everything that happens at school curriculum extra curricular activities interaction with parents and communities and through formal organization and structures One of the book s central questions is Are educators merely teaching students skills and knowledge to prepare them for the world of work or is education more about encouraging students to thrive within a pluralistic society This book reveals that democracy is an ethos an ideology a set of values a philosophy and a complex and dynamic terrain that is a contested forum for debate From seasoned veterans to emerging scholars these writers challenge the idea that there is only one type of democracy or that democracy is defined by elections Using a range of theoretical conceptual and methodological approaches each essay makes a compelling case for how education can advance a more critical engagement in democracy that promotes social justice and political literacy for all Diverse examples illustrate the theme of doing democracy With its numerous models for teaching and learning to encourage critical thinking and engagement this book is certain to be an invaluable resource to educators researchers students and anyone with a passion for democratic ideals

Investigating Gender Becky Francis, Christine Skelton, 2001 Investigating Gender maps the contemporary and developing theoretical debates in the field of gender and education and provides an overview of the diverse areas of research within gender and education *Forum D'histoire Orale*, 1995 Desire and Decline Frances Katherine Vavrus, 2003 Desire and Decline explores the privileged place of education in local national and global development discourses about population HIV AIDS and environmental conservation Desire signals the global consensus on the view that education is central to solving problems of development Decline on the other hand draws attention to the growing gap between those who have access to basic social services such as education and those who do not Based on multiple periods of fieldwork on Mount Kilimanjaro Frances Vavrus links local and global narratives about the potential of education to enhance development but also reveals its limitations in postcolonial countries experiencing the pressures of globalization Vavrus concludes with portraits of local development initiatives that leave readers with a clear sense of the complexity of education s role in development and the importance of political economic analysis for global population health and environmental policy

Leading Learning Bob Lingard, 2003 How can we understand and theorise school leadership How can school leadership work towards enhancing student learning What are the constraints and possibilities for school leadership at the beginning of a new century This new title is relevant to anyone concerned with improving schooling and enhancing the professional practices of educators The authors focus on leadership for enhancing student outcomes both academic and social While recognizing the significance of the principal or headteacher in school leadership the authors argue a strong case for the dispersal of leadership Based on extensive research conducted within schools Focuses on leading

learning across the school Theoretically sound reflects the theories of Bourdieu and Foucault Politically aware discusses the context of leadership within school communities educational systems global pressures new policy directions Current topical and thoughtful Leading Learning is key reading for principals or headteachers teachers and other school leaders policy makers and for students studying educational administration *Japanese Educational Reform* Jie Qi,2001 Consuming Children Jane Kenway,Elizabeth Bullen,2001 This volume argues that people are entering another stage in the construction of the young as the demarcations between education entertainment and advertising collapse and as the lines between the generations both blur and harden Drawing from the voices of students and from contemporary cultural theory this book provokes the reader to ponder the role of the school in the age of desire BOOK JACKET *Boletin Internacional de Bibliografia Sobre Educacion* ,2002
