diplomat to argue his points the ruler to administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer's art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph      Dictionary Catalog of the Map Division New York Public Library, Map Division, 1971      *Aquifer Systems Management: Darcy's Legacy in a World of Impending Water Shortage* Laurence Chery, Ghislain de Marsily, 2014-04-21 Presented at the International Association of Hydrogeologists Dijon Symposium this book contains 43 selected papers grouped into six topics that address the following issues large aquifers resource assessment large aquifers water salinity and evolution karstic and carbonate aquifer systems geothermal aquifer systems aquifer contamination studies and aquifer monitoring systems and management In celebration of the 150th anniversary of the publication of Darcy's Law the volume includes a summary of Darcy's life and his contribution to science and five invited contributions on modern methods to estimate the hydraulic conductivity of aquifers      **A Popular Atlas of Comparative Geography Comprehending a Chronological Series of Maps of Europe and Other Lands at Successive Periods, from the Fifth to the Later Half of the Nineteenth Century** William Hughes, 1870      Bibliographic Guide to Maps and Atlases, 1990      *Map Link Catalog*, 2008      **A Handbook for Travellers in South Wales ...
