Chan Cultivation Via Science:

The Nature and Rationale of Zen/Chan and Enlightenment Ming Dong Gu, 2023-07-14 This book initiates a paradigm shift away from Zen Chan as quintessentially Buddhist and examines what makes Chan thought and practice unique and original through an interdisciplinary investigation of the nature and rationale of Chan and its enlightenment. Exploring how enlightenment is achieved through Chan practice and how this differs from other forms of Buddhism, the book offers an entirely new view of Chan that embraces historical scholarship, philosophical inquiry, textual analysis, psychological studies, Chan practice, and neuroscientific research and locates the core of Chan in its founder Huineng's theory of no thinking, which creatively integrates the Taoist ideas of zuowang (forgetting) in seated meditation and xinzhai (fast of heart) with his personal experiences of enlightenment. It concludes that Chan is the crystallization of an innovative synthesis of Buddhism, Daoism, and Confucianism, as well as other resources of somatic and spiritual cultivation, and that enlightenment is a momentary return to the mental state of a baby before birth. This book will appeal to students and scholars of religion, philosophy, and neuroscience. It will also offer new insights to thinkers, writers, artists, therapists, and neuroscientists, as well as those practicing Zen, Mindfulness, and psychotherapy. *The Oxford Handbook of Lived Buddhism* Courtney Bruntz, Brooke Schedneck, 2025-11-10 Attention to lived religion has significantly shaped religious studies and has only recently impacted the field of Buddhism. Rather than asserting a separation between real religion (happening within official organizations) on the one hand and folk traditions practiced by everyday adherents on the other, the lived religion model understands the religious experience as an ongoing negotiation of personal practice and belief. Given the relative fluidity of Buddhism, a lived religion approach decenters the most significant authorities while valuing the varied perspectives of ordinary practitioners. As the field develops, *The Oxford Handbook of Lived Buddhism* fills a major gap in the scholarship, offering insight into the practices, social interactions, sacred spaces, and outward expressions of the religion. As such, the Handbook will be a timely contribution, opening new possibilities for study alongside texts and institutions. *Zhuangzi and Modern Chinese Literature* Jianmei Liu, 2016 This is a powerful account of how the ruin and resurrection of Zhuangzi in modern China's literary history correspond to the rise and fall of modern Chinese individuality. By examining the twentieth-century reinterpretation and appropriation of Zhuangzi, the author explores modern Chinese writers' complicated relationship with tradition. **Indian Science Abstracts**, 2009-11 **Environmental Resources Use and Challenges in Contemporary Southeast Asia** Mario Ivan Lopez, Jafar Suryomenggolo, 2018-05-17 This edited volume introduces dynamic approaches to the study of Southeast Asia's environmental diversity from different disciplinary perspectives at the interface between the natural and social sciences. It brings together research on the region's environmental resource use and shared ecological challenges in the context of present-day globalization to offer insights for possible future directions. The book introduces unique approaches to the study of Southeast Asia's environmental changes and resource management under the influence of

intensifying economic change in the region It also examines the slow erosion of Southeast Asia's rich environment and addresses serious issues such as the decrease in biodiversity and tropical forests and the degradation of peat lands At the same time it discusses the social issues that are tied to energy dependent growth and have intensified over the last two decades It also analyzes the new roadmaps being created to protect conserve and manage the environment By investigating the many ecological issues surrounding us the volume brings to light the constant struggles we face while trying to develop a more inclusive and equitable approach to natural resources governance This volume is relevant for students academics and researchers who have an interest in the Southeast Asian environment and the way in which we use and interact with it
