Change At Kings Cross From 1800 To The Present:

Change at King's Cross Michael Hunter, Robert Thorne, 1990-01-01 *The Crisis of London* Andy Thornley, 2003-09-02

London is in a mess This is evident from the increasingly unpleasant experience of daily life in the capital from homelessness and unemployment to frustrating transport facilities and the general bad quality of the environment However it is not only citizens of London who are suffering but the business community as well London is having to face increasing competition from other European cities There is growing appreciation and debate about these problems from companies political parties local government and community organisations *The Crisis of London* provides a solid analysis of what has gone wrong and explores policy directions that could make the city a more humane and livable place Beginning with a discussion of the basic elements of a home a job and a means of travelling around it becomes clear that even in these essential aspects London is failing A feature of the crisis is an increasingly divided city with conditions for the poorer citizens worsening all the time The authors consider the quality of the environment They examine the greening of the city and the need for sustainability the privatisation and dehumanisation of public spaces the fear experienced by women denying them full access to the capital the position of ethnic minorities and the perspectives of local communities Using the case studies of Docklands and Kings Cross the author s raise the crucial question of the government of the capital This review of the city concludes with an analysis of a potential vision for London involving both the creation of the necessary institutional structures and also the will to address the needs of all the capital s citizens The authors argue that a strategic approach is needed which accepts that the market alone cannot solve the problem Stronger public intervention and government action is necessary if London is to match the developments in other European cities **Railways and the Western European Capitals** M. Nilsen, 2008-10-13 This book looks at the effect of railways on London Paris Brussels and Berlin focusing on each city as a case study for one aspect of implantation **Transport in British Fiction** A. Gavin, A. Humphries, 2016-01-12 *Transport in British Fiction* is the first essay collection devoted to transport and its various types horse train tram cab omnibus bicycle ship car air and space as represented in British fiction across a century of unprecedented technological change that was as destabilizing as it was progressive *Ottley's Bibliography of British Railway History. London Kenneth John Panton, 2001-11-19 Panton details London's growth from its foundation in Roman times to its modern place as one of the world's preeminent financial, commercial and cultural capitals. Entries cover general themes such as immigration, housing, street markets and health care, as well as specific topics including individual historic buildings, financial institutions, museums, transport modes, major city center hotels and West End theaters. Significant contributors to the city's government, such as the legendary Dick Whittington, also receive attention along with immigrant groups and major events such as the Great Fire, the Great Plague, the development of the subway system and the growth of the Stock Exchange. In addition, a chronology details major events; there are lists of Lord Mayors and leading local government officials and a table outlines population growth over the last two hundred years. Appendices contain borough council contact information and world wide web addresses which provide access to additional information through the Internet.

Railway Stations Julian Ross, 2000 This work discusses the planning, design and management of railway stations. It examines a range of stations. Commercial aspects and matters of image and branding are explored alongside technical and operational issues.

The British National Bibliography Arthur James Wells, 1995

Bibliography of Printed Works on London History to 1939 Heather Creaton, Tony Trowles, 1994 The history of London is so important in national and indeed international terms it seems extraordinary that this is the first general bibliography of the subject to appear. It contains over 22 000 selected references to books and articles on the history of London from the Dark Ages to the beginning of the Second World War. The whole of the former GLC area plus the City is covered. Arrangement is by subject and there is a substantial analytical index. Material for the bibliography was collected from specialist libraries all over London and beyond. It is a starting point for any enquiry about London's development over the centuries, whether from the academic historian, the amateur or the general enquirer. A supplement is planned to cover new material on the period.

Archinesia 02 Imelda Akmal, 2012-01-01 Hotels and resorts are not an easy building to design. The relationships of hotels and the city are also an important notion of landmark within cities. The hotels are also to be seen as a reflection of the complex social geographies of city life.
