Changing Cities:

Our Changing Cities John Fraser Hart, 1991-08 In *Our Changing Cities* some of the nation's most eminent urban geographers bring their special expertise to bear on the American urban scene. They describe how our cities have evolved, assess their current character, and look ahead to the momentous changes yet to come. *Cities and Climate Change* Harriet Bulkeley, 2013-05-07 Climate change is one of the most significant global challenges facing the world today. It is also a critical issue for the world's cities. Now home to over half the world's population, urban areas are significant sources of greenhouse gas emissions and are vulnerable to the impacts of climate change. Responding to climate change is a profound challenge. A variety of actors are involved in urban climate governance, with municipal governments, international organisations, and funding bodies pointing to cities as key arenas for response. This book provides the first critical introduction to these challenges, giving an overview of the science and policy of climate change at the global level and the emergence of climate change as an urban policy issue. It considers the challenges of governing climate change in the city in the context of the changing nature of urban politics, economics, society, and infrastructures. It looks at how responses for mitigation and adaptation have emerged within the city and the implications of climate change for social and environmental justice. Drawing on examples from cities in the north and south and richly illustrated with detailed case studies, this book will enable students to understand the potential and limits of addressing climate change at the urban level and to explore the consequences for our future cities. It will be essential reading for undergraduate students across the disciplines of geography, politics, sociology, urban studies, planning, and science and technology studies. **Changing Cities** Janet L. Abu-Lughod, 1991 Climate Change and Cities Cynthia Rosenzweig, William D. Solecki, Patricia Romero-Lankao, Shagun Mehrotra, Shobhakar Dhakal, Somayya Ali Ibrahim, 2018-03-29 *Climate Change and Cities* bridges science to action for climate change adaptation and mitigation efforts in cities around the world. Global Cities and Climate Change Taedong Lee, 2014-08-21 Cities have led the way to combat climate change by planning and implementing climate mitigation and adaptation policies. These local efforts go beyond national boundaries. Cities are forming transnational networks to enhance their understandings and practices for climate policies. In contrast to national governments that have numerous obstacles to cope with global climate change, in the international and national level, cities have become significant international actors in the field of international relations and environmental governance. *Global Cities and Climate Change* examines the translocal relations of cities that have made an international effort to collectively tackle climate change. Compared to state-centric terms, international or transnational relations, translocal relations look at policies, politics, and interactions of local governments in the globalized world. Using multi-methods such as multi-level analysis, comparative case studies, regression analysis, and network analysis, Taedong Lee illustrates why some cities participated in transnational climate networks, for what conditions cities internationally cooperate with other cities, with which cities, and which factors influence climate policy performance.
