Changing Classes Vol 46 Stratification And Mobility In Post Industrial Societies:

Handbook of European Societies Stefan Immerfall, 2009 European integration is one of the most ambitious and socially far reaching developments in world politics and in world economics Against growing opposition and despite increasing social heterogeneity the European Union continues to expand and to acquire new competences But to what extent is the self proclaimed ever closer union among the peoples of Europe a social reality In which ways is the political European project anchored in social developments How does social change impinge upon political integration Societal trends in multi cultural multi ethnic multi lingual and socially diverse Europe have never been studied systematically Handbook of European Societies Social Transformations in the 21st Century sets to rectify this neglect of societal developments in Europe providing a groundwork for the sociology of European integration The book portrays social life and social relations in the enlarged Europe and gives a perspective on the European Union as an evolving social entity Handbook of European Societies is a pioneering source book analyzing the current social patterns on the continent It covers a representative selection of major topics of social concern and sociological relevance such as Collective Action Consumption Identity Power Structure Sexuality Stratification and Well being Each contribution probes key developments in a strictly comparative manner The Handbook thus offers a detailed look into the intricacies of the national societies of Europe and into the prospect of an emerging European society The Editors have enlisted leading researchers to synthesize existing knowledge and to make use of many different data sources in a straight forward style The contributions stay away from jargon simple labeling and sweeping assertions Instead they provide solid and accessible information on a wide variety of social trends and processes within and across European societies

Research Handbook on Intergenerational Inequality Elina Kilpi-Jakonen, Jo Blanden, Jani Erola, Lindsey Macmillan, 2024-05-02 The Research Handbook on Intergenerational Inequality is motivated by a core question in social science to what extent does one's family background and childhood experience predict success in life Bringing together experts in their respective fields from across the globe this innovative Research Handbook provides a comprehensive multidisciplinary account of the rich research on intergenerational inequality focusing on its origins in sociology and economics This title contains one or more Open Access chapters

Recent Social Trends in Canada, 1960-2000 Lance W. Roberts, 2005 Canadian society has changed dramatically since 1960 This work captures the scope and range of these changes through a systematic documentation of seventy eight social trends The introduction summarizes and locates the major waves of change The authors then document each trend in relation to eighteen thematic groups that include age community women labour management stratification social relations the state mobilizing institutions social forces ideologies households lifestyle leisure education integration and attitudes and values In contrast to many recent works and journalistic reports Recent Social Trends in Canada concentrates on the trajectory of change rather than on current events It provides a longitudinal context in which unfolding events can be interpreted in a broader historical and

international context Comparable volumes in the McGill Queen's Comparative Charting of Social Change series describe similar tendencies in the United States Quebec France Germany Italy Greece Russia and Bulgaria making it possible to situate the Canadian experience in a global context *Iberian Trade Unionism* Jos   Mar  a Magone, 2001 One of the most neglected areas of the European integration process is the role that trade union confederations may play after the full establishment of the Economic and Monetary Union The gradual establishment of the four freedoms enshrined in the Single European Act would require a transformation of the present strategies of trade union confederations toward more flexibility and towards the ability to take part in different levels of the European integration process *Iberian Trade Unionism* highlights the emerging patterns of cooperation between national subnational and supranational actors and the impact on these different levels Unlike most literature on the study of democratization and Europeanization *Iberian Trade Unionism* aims to break the dominant focus on political parties and political institutions by raising awareness of the importance of interest groups such as trade union confederations in contributing to a strengthening of democratic governance The central thesis is that both Portuguese and Spanish trade unions are becoming increasingly part of a transnational European strategy which shapes the internal organizations toward professionalism and democratization Part 1 Contextualizing Iberian Trade Union Strategies deals with the operations of both Portuguese and Spanish trade union confederations Part 2 The National Systems of Interest Intermediation and Trade Union Confederation Strategies analyzes the transformation of the national systems of intermediation in the 1990s which were affected by a decline in steering power of Spanish and Portuguese political systems vis vis global and European political and economic processes Part 3 Subnational and Transnational Policies of Iberian Trade Union Confederations deals with policies and strategies The last chapter treats the integration of Iberian trade union confederations in the institutions of the European Union as well as the ITUCs and is based on original research done in Madrid Lisbon and Brussels This timely look at interest groups and lobbying in the European Union will appeal to scholars studying European integration and the role of interest groups in it and to students of Spain Portugal or southern Europe Jos M Magone is a lecturer in European politics in the Department of Politics and Asian Studies University of Hull He was Deutsch Guest Professor at the Wissenschaftszentrum Berlin f  r Sozialforschung and has published extensively on European politics Among his publications are *The Changing Architecture of Iberian Politics* and *European Portugal The Difficult Road to Sustainable Democracy* Magone provides a detailed and rich description of the structures that unions face at the European level and presents a useful account of the existing attempts of unions to respond to this relatively new environment For this reason his book is well worth reading not only for readers interested in Iberian trade unionism but also for those interested in the effects of European integration on unions in general *Industrial and Labor Relations Review* A useful overview of present developments and is recommended for European economics and political science collections at the graduate and research levels *Choice* This book covers important and interesting ground Its greatest contribution is empirical It provides a wealth of

information on multilevel governance structures in the EU particularly Social Europe and a valuable overview of the evolution of trade unionism in Portugal and Spain since democratization Perspectives on Politics **Young Workers, Globalization and the Labor Market** Hans-Peter Blossfeld, 2008-11-28 Underpinned by the fact that the globalization process and the subsequent increased level of market uncertainty have paved the way for employment flexibility in modern societies this book examines the labor market chances of young adults in the US and in ten European societies over the past three decades As young adults represent a very vulnerable labor market group flexible and insecure employment tends to be pronounced especially at labor market entry The contributors therefore explore which groups of young adults are especially affected by increasing employment insecurities European Portugal J. Magone, 1996-12-13 This book analyses the Europeanization of the Portuguese political system in the context of globalization and the so called Third Wave of Democratization It pursues the thesis that democratization and Europeanization are two intertwined processes in the case of Portugal Integration into the European Union has changed considerably the rationalities within the political structures of the Portuguese political system Furthermore the author stresses the necessity to encourage greater political participation of the population and to evolve towards a project of sustainable democracy Migration and Gender in the Developed World Paul Boyle, Keith Halfacree, 2002-11 This book demonstrates how migration is highly gendered with the experiences of women and men often varying markedly in different migration situations Estudios sociológicos, 2005 **Czech sociological review**, 2003 **Subject Guide to Books in Print**, 1991 **Постиндустриальный мир и Россия** Institut mirovõj èkonomiki i mezhdunarodnykh otnoshenii (Rossiiskai akademii nauk), 2001 **Stiluri de viață în România după 1989** Mircea Comșa, 2006 **Мировая экономика и международные отношения**, 1998 **The British National Bibliography** Arthur James Wells, 1993 , 2001 *Vorurteile und Rassismus* Andreas Zick, 1997 Sociological Abstracts Leo P.
