**The Origins And Spread Of Agriculture And Pastoralism In Eurasia** David R. Harris, 2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole this major contribution should be essential reading for archaeologists anthropologists biologists and geographers Adopting a novel approach to the subject the authors examine it first in terms of seven different disciplinary perspectives social ecological genetic linguistic biomolecular epidemiological and geographical Then 20 case studies are presented which are based primarily on archaeological and biological evidence and which relate to three major regions Southwest Asia Europe and Central Asia to the Pacific The book concludes with an overview of Eurasia as a whole The transition from hunting and gathering to agriculture had revolutionary consequences for human society It led to the emergence of urban civilizations and ultimately to humanity's almost complete dependence on relatively few domesticated animals and plants The subject has been much studied but the results have tended to be interpreted largely in terms of local cultural sequences with insufficient comparison made with evidence from other areas In contrast this book provides a continental scale framework with its scope extended to

pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10 000 years ago Comprehensive and authoritative The Origins and Spread of Agriculture and Pastoralism in Eurasia should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization *Regional Approaches to Adaptation in Late Pleistocene Western Europe* Gail Larsen Peterkin, Heather Alynn Price, 2000 This volume brings together examples of research carried out at a variety of spatial and temporal scales of analysis all focused on Late Pleistocene hunter gatherers in Europe The contributors represent a wide range of theoretical perspectives The various theoretical and methodological attempts recounted thus represent different approaches to the understanding of a single well studied macro region during a crucial transitional period The economic intensification exhibited by some of the hunter gatherers of Late Pleistocene Europe laid the groundwork for the subsequent development of agriculture and the increasing cultural complexity that accompanied this revolution in human prehistory Thus the papers contained in this volume have broader implications and applications for a more accurate understanding of the role played by the concept of the region in anthropological and archaeological theory as well as for a more accurate understanding of the people who inhabited them in the prehistoric past **Hunters in Transition** Marek Zvelebil, 2009-06-18 Hunters in Transition analyses the emergence of post glacial hunter gatherer communities and the development of farming *Distorting the Past* Linda R. Owen, 2005 Gender studies Arbeitsteilung Frau Urgeschichte J ger und Sammler Ethnologie Biologie *Journal of Danish Archaeology*, 1991 *Recent Studies in the Final Palaeolithic of the European Plain* Bodil Bratlund, Berit Valentin Eriksen, 2002 Using the regional diversity of environmental cultural changes that were rapid would have major use among geographically geomorphologically different regions this text aims at inter as well as intra regional comparison contrast of approaches **Antiquity** Antiquity Publications Ltd, 1994 **ANTIQUITY** Martin Carver, 2004 **Antiquity**, 1995 Includes section Reviews *Mesolithic on the Move* Lars Larsson, 2003 What do we know about the Mesolithic What distinguishes the Mesolithic from earlier and later periods of human history What do the Mesolithic cultures of Europe have in common and what differentiates them from one another This comprehensive volume contains 89 papers which attempt to answer the questions of the Mesolithic the papers were presented at the Sixth International Conference on the Mesolithic in Europe held in Stockholm 2000 **Mesolithic Northern England** Penny Spikins, 1999 Study addressing the idea of gradual population increase focussing on northern England and also examining issues such as resource exploitation and settlement patterns **Ethnic Boundaries in Neolithic Norway** Knut Andreas Bergsvik, 2006 During the transition to the early Neolithic a number of changes took place among the hunter fishers of southern Norway One of the most important social changes may have been the development of more marked ethnic boundaries which were related to increasing social inequality among the local groups *La grotte du Bois Laiterie* Marcel Otte, Lawrence Guy Straus, 1997 **Early Humans at the Gates of Europe** David Lordkipanidze, Ofer Bar-Yosef, Marcel

Otte,2000      **Archaeological Review from Cambridge ,2006**
